JOURNAL

PERIODICAL READING ROOM

VOL. XCIII—No. 12—WHOLE NO. 4818 Published at 1711 Connecticut Ave., N.W., Wash. 9, D. C. Ent. as 2nd class matter at P. O. at Washington, D. C.

Washington, D. C., 19 November 1955

THREE TOP ARMY LEADERS in the Far East met at a recent official reception in Camp Zama, Japan. General L. L. Lem-nitzer (left), Commander in Chief, UNC and FEC, welcomed the new AFFE/8th Army Deputy Commanding General, Lt. Gen. Charles D. Palmer (right). General I. D. White (center), Commanding General, AFFE/8th Army, gave the reception for his new Deputy and Mrs. Palmer.

THE TULLAHOMA STORY—see Page 11 for report on the First National Press Inspection at the Air Force's Arnold Engineering Development Center.

Seasoned Story

In the winter and spring of 1955, the Defense Department goes before Congress and pleads for money to build homes for military families and barracks for Servicemen occupying inadequate quarters. The Senate and House listen to the facts and vote money for specified projects. projects.

During the summer, under Budget Bureau pressure, the Pentagon reviews anew the program it has championed. In the fall, Defense Secretary Charles E. Wilson tells the Services to take still another look at their construction programs.

Before winter sets in, the orders go out to cancel projects. Ft. Lee, Va., for example, will lose more than \$1,000,000 in family housing. This reversal will be felt at numerous other Army, Navy, Air Force and Marine Course installations. and Marine Corps installations.

Air Force Tells 5-Year Promotions, Forecasts Zones—Selection Ratios

(Promotion Report Text, Page 3)

The Air Force, in an official statement, has forecast temporary promotion plans through 1959 or 1960, when it foresees an end to the temporary advancement program.

It is predicted that the next four or

five years will see about one out of every 20 eligible lieutenant colonels selected for promotion to temporary colonel.

The ratio is expected to be 1/15 to

The ratio is expected to be 1/15 to lieutenant colonel; 1/10 to major and 1/3 to captain.

The Air Force, in its Personnel Newsletter, estimates that required time in grade, which is computed as of 31 Dec. of the fiscal year concerned, likely will remain constant: remain constant:

Colonel—3 Lt. Col—3 Major—4 Capt.—2

At present, the average time in grade for lieutenant colonels selected for temporary colonel is 4½ years; almost 6 years for promotion to lieutenant colonel; 4½ to major; and 3 to captain.

Promotions to first lieutenant are made, by major, commanders after 18

made by major commanders after 18

Nathan F. Twining and Mrs. Twining, the former Maude McKeever of Oahu and Kauai, T. H., stopover in Honolulu, en route to Tokyo. General and Mrs. Twining were greeted at Hickam AFB by Admiral Felix P. Stump, USN, CinC, Pacific, and Maj. Gen. Sory Smith, USAF, commander, Pacific Air Force.

Maj. Gen. Megee First Marine Aviator To Hold Post Of Assistant Commandant

(USMC Generals Move—see Page 35)

For the first time in history, an aviator has been named to the Marine Corps'

number two post.

The new Assistant Commandant and Chief of Staff, Maj. Gen. Vernon E. Magee, USMC, will move into the three-star billet in Language.

the three-star billet in January to replace Lt. Gen. Randolph McC. Pate McC. Pate, USMC, who be-becomes the 21st Commandant, succeeding General Lemuel C. Shepherd, jr., USMC.

General Megee

General Megee is currently serving as Commanding General, Aircraft, Fleet Marine Force, Atlantic, with Headquarters in Norfolk, Va.

An aviator since 1932, General Megee is a veteran of the Korean War and three WWII campaigns. He served on expeditionary duty in Haiti, China and Nicaragua. He is a former enlisted man and was commissioned in 1922.

commissioned in 1922.

General Megee's selection, announced along with assignments for seven other generals and one general-selectee, points up the Corps' decision to team up ground and air officers wherever possible. It is noted that wherever there is a

Service Family Rents Will Be Affected By Supreme Court Housing Tax Decision

More than 50,000 Service families will

More than 50,000 Service families will be affected by a decision to be handed down in the near future by the United States Supreme Court.

The Nation's highest court has agreed to rule on the question of whether local taxes may be imposed on Wherry housing occupied by military personnel and their dependents.

The ruling was asked by the Offutt Housing Co. of Omaha, Neb., following a Nebraska Supreme Court decision which established the right of Sarpy County (Neb.) to impose a property tax on military housing at Offutt AFB near Omaha.

The Justice Department has advanced

the argument that if counties, boroughs

the argument that if counties, boroughs and township boards of education are permitted to tax such housing, the burden of the levy will fall on Service personnel in the form of higher rents.

This, the Department states, would defeat the purpose of the Wherry Act which was passed by Congress in 1949 to provide better and cheaper housing for military families.

Although the Wherry Act is now defunct—it was replaced this year by new military housing legislation—159 projects containing over 50,000 dwelling units were built under the plan and are being occupied by military personnel throughout the States.

FOUR ARMED SERVICES were represented at the Fall luncheon meeting of the San Francisco Post, American Ordnance Association. From left: Brig. Gen. L. J. Rumaggl, USA, Chief of Staff, Headquarters, Sixth Army; Maj. Gen. R. H. Pepper, USMC, Commanding General, Marine Corps, Department of the Pacific; Lt. Gen. E. R. "Pete" Quesada, USAF-Ret., General Manager of Lockheed Aircraft Corporation's missile systems division; Brig. Gen. Munro MacCloskey, USAF, Commander, 28th Air Division (Defense); VAdm. F. S. Low, USN, Commander, Western Sea Frontier; and Lawrence S. Fletcher, president of the Ordnance Post.

Army Wants Own Integral Aviation

Secretary Wilber M. Brucker, calling for "maximum mobility and flexibility under all circumstances," has reasserted the need for ex-panded Army aviation, but emphasized simultaneously that his Service "does not seek to create an Army Air Corps duplicating functions of the Air Force." In an address on 17 Nov. before

the National Security Industrial Association in New York City, Mr. Brucker stated that in addition to long and medium range Air Force transports and assault aircraft, "the Army has a vital need for light aircraft of its own—both fixed wing planes and helicopters—to furnish battlefield support of the

combat operations of a field army."
Stressing the Army's requirement for maximum mobility and flexibility, Secretary Brucker said:

"It must, for example, be able to transport its troops by air—thousansport its troops by air—thousands of miles if necessary—in time to dominate a dangerous situation in any area before it gets out of hand.***

"For example, an entire Infantry division, including its essential automotive equipment and organic artillery, could be moved from the United States to Europe in approximately 390 of the Air Force's big C-124 Globemasters. Also, 627 of the famous C-119 Flying Boxcars could transport the assault element of one airborne division up to 750 miles from its base, and drop it into combat. With the full cooperation of the Air Force in the procurement of troop-carrying and cargo aircraft, and the help of the air-craft industry in the design and de-velopment of improved types of planes which meet the Army's requirements, we can attain the de-gree of air transportability which we believe is essential to the proper performance of the Army's mission in the atomic age. A new plane now in limited production-the C-123 Assault Transport—can take off from and land upon ordinary, unimproved fields with about 60 men and equipment. It will contribute much to our mobility. In the offing is a great new heavy transport that will fly intercontinental loads more than twice as great as those car-ried by the Globemaster. We are

moving forward.
"In addition to the long and me-"In addition to the long and medium range Air Force transport and assault aircraft which I have discussed, the Army has a vital need for light aircraft of its own—both fixed wing planes and helicopters—to furnish direct battlefield support of the combat operations of add arms Statistics. tions of a field army. Specifically, this means aircraft for command, observation, artillery adjustment, of the wounded, for the rapid movement of patrols, outposts, and other small bodies of troops, and for similar purposes.

"The Army does not seek to create an Army Air Corps duplicating functions of the Air Force. The Army's need is for relatively slow, my's need is for relatively slow, low-flying planes, geared to the environment of the Infantryman—just the opposite of the fast, high-flying aircraft of the Air Force. There is no conflict in this area. Army aviation is as much an integral part of the ground forces as the Artillery. It is an escential element. tillery. It is an essential element of the battlefield mobility of our troops, and I am sure that you will troops, and I am sure that you wan
readily agree that this type of aviation must be under the full and immediate control, and subject to the
direct command, of the commander esponsible for ground operations.

Pentagon Nixes Boost In Milk Ration; Says Quart A Day Would Cost \$45 Million

The Defense Department has said "no" to a proposal which would increase the milk ration for Service personnel.
Legislation introduced in the House (HR 4914) by Representative W. Sterling Cole (R-NY) boosts the allowance of fresh milk to a minimum of one quart

each day for each Serviceman.

The Pentagon estimates that the plan would cost \$45 million and "would pro-

would cost \$45 million and "would provide more milk than is necessary."

Furthermore, the Department said in a letter to Chairman Carl Vinson (D-Ga) of the House Armed Services Committee, the proposal is "undesirable" because it represents "a piecemeal change in the retion laws" represents "a piecemeal change in the ration laws."

The Pentagon pointed out that the Hoover Commission has recommended

a uniform ration law for the Army, Navy, Air Force and Marine Corps, and that this recommendation "is under study in the Department of Defense at the present time."

study in the Department of Defense at the present time."

The Department said "nutritionally balanced meals" are provided for Army and Air Force personnel "within the budgetary limitations established by Congress" and for Navy personnel "within the quantitative limits of the Navy ration law. Menus include balanced amounts of the various foods found to be acceptable to men and women of military age."

If a daily quart of milk was provided for each member of the Armed Services, the Pentagon added, it "would not be consumed" in many instances.

Navy Faces PO Crisis; Pushes On-Board Tng.

High ranking Navy officers are con-cerned about the fact that the first cruise enlistments of a large bloc of petty offi-cers soon are due to expire.

The Atlantic and Pacific Commanders in-Cheif have instructed their subordi-nate officers to "take vigorous action" to ensure that a maximum number of petty officer candidates are prepared to take, and pass, the February '56 promotion and pass, the February

It is stated that the attainment of the FY '56 promotion goal requires that about three-fourths of all EM in pay-grade E-3 take the February exam, and that three-quarters must pass and be eligible for advancement if the fleets are to be manned properly. If three-fourths of the required number pass, the August '55 performance level will be doubled.

Recently, the Bureau of Naval Personnel reduced the requirements for promotion to E-3 by three months and emphasized the need for on-board training to prepare men for E-3 and E-4 duties.

The 1 Dec. deadline for requesting performance tests (BuPers Inst. 1418PT7B) has been extended to give more men a chance to take the February exam.

New AAF Med. History

Ten years in preparation, Medical Support of the Army Air Force in World War II, ith a foreword by Maj. Gen. Dan C. Ogle, Air Force Surgeon General, has been published and is available through the Government Printing Office in Washington, D. C., for \$7.

The 1027-page, illustrated volume tells how "military medicine was propelled into a new dimension as it became air-borne." It is written by Mae Mills Link and Hubert A. Coleman.

BRIG, GEN. MACK M. GREEN, USA. Commanding General of Valley Forge Army Hospital, displays the Medical Service Corps insignia on lapel of newly-commissioned 2d Lt. John Vittrup, a senior at the University of Pennsylvania's School of Medicine. Vittrup, son of Maj. Gen. R. L. Vittrup, USA, Deputy Assistant Chief of Staff of G3 Department of the Army, was the first East Coast student to gain a commission under a new program being offered to assist seniors complete their last year of medical school.

NEW TROPIC LIGHTNING B.G. Brig. Gen. Edwin A. Walker, USA, right, appointed 25th (Tropic Lightning) Infantry Division Artillery Com-mander, was recently welcomed with an mander, was recently welcomed with an honor guard ceremony at Schofield Barracks. USMC Sets Reserve Selection Bd. Dates

The Marine Corps has revealed the tentative dates during calendar year 1956 that selection boards will be con-vened to pick Inactive Reserve officers

and Reserve officers on active duty with the Reserve program for promotion. On 17 January, boards are slated to meet to consider male officers for ad-vancement to the ranks of colonel and lieutenant colonel, and women officers for promotion to major and contain for promotion to major and captain.

Lieutenant colonels senior to and in-cluding Emmett O. Swanson, who were not on active duty with the Regular es-tablishment on 21 July 55, and whose names are not on the promotion list will be given consideration.

Majors senior to and including Laurin N. Dillon, who were not on active duty on 1 September, and whose names are not on a promotion list, will be consid-

not on a promotion list, will be considered by the board.

Women Reserve captains senior to and including Margaret S. Ordemann and first lieutenants senior to and including Pearl A. Jackson, who were not on active duty on 26 September, and are not no a promotion list will be considered.

on a promotion list, will be considered.
On 31 January, a board will sit to choose male officers for the rank of major. Eligible are captains senior to and including John R. Reckamp, who were not on active duty on 26 September. First lieutenants will be considered by a board slated to meet on 23 February.

board slated to meet on 23 February All senior to and including Paul Francis who were not on active duty on 7 No-vember are eligible for advancement.

The Reserve warrant officer selection board will form on 13 March. Considerboard will form on 13 March. Consideration will be given to W-1's who have three years in grade before or during 1956, and those in pay-grades W-2 and W-3 with six years in grade before or in 1956. This board also will consider Reserve second lieutenants who were commissioned before or during calendar year. missioned before or during calendar year 1953 for permanent advancement to first lieutenant.

New Ft. Lee Engineer

Lt. Col. William Jarret, USA, has re-placed Maj. Albert R. Martin, USA, as Post Engineer. Major Martin will remain as executive assistant.

Dr. Dryden, NACA Dir., Wins Wright Award

Dr. Hugh L. Dryden, Director of the National Advisory Committee for Aeronautics, has been unanimously selected as the recipient of the Wright Brothers' Memorial Trophy for 1955.

Col. Thomas G. Lanphier, jr., USAF-

Res., is President of the National Aero-nautic Association, which administers the Trophy. It has been awarded annu-ally since 1948 "For significant public service of enduring value to aviation in the United States."

The citation points out that Dr. Dryden "has had a distinguished ca-reer entirely devoted to the public service, first with the Bureau of Standards from 1918 to 1947, and since then with the NACA. During his career with the Bureau of Standards he was engaged almost entirely on scientific aeronautical problems, largely those referred to said Bureau by the NACA and financed by NACA funds. By his pioneering work on the measurement of turbulence in wind tunnels and on the mechanics of flow within the boundary layer, he has made contributions of enduring value to avia-tion in the United States."

During WW II Dr. Dryden served as chief of Section 5.1, the "Washington Project" of the Division of New Missiles of the National Defense Research Committee, and led the development of the radar-homing missile Bat used by the Navy against the Japanese. He also served on numerous committees dealing. served on numerous committees dealing served on numerous committees dealing with guided missiles under the sponsorship of the Joint Chiefs of Staff, the NA-CA, the Army Ordnance Department, and the Army Air Forces.

the Army Air Forces.

Dr. Dryden now serves as a member of the Technical Advisory Panel on Aeronautics of the Department of Defense; the Scientific Advisory Board to the Chief of Staff, Air Force; Science Advisory Committee to the President; the Interdepartmental Committee on Scientific Research and Development of which he was chairman 1951-53; and the Scientific Advisory Committee of the Ballistics Research Laboratory at Aberdeen Proving Ground, Md. deen Proving Ground, Md.

deen Proving Ground, Md.

Members of the 1955 Wright Brothers
Memorial Trophy Committee which
selected Dr. Dryden for the award were:
Adm. DeWitt C. Ramsey, USN-Ret.,
President, Aircraft Industries Association; Harold L. Pearson, President, Air
Transport Association of America; Robert E. Gross, President, Institute of
Aeronautical Sciences; Dr. Jerome Hunsaker Chairman National Advisory Com-Aeronautical Sciences; Dr. Jerome Hunsaker, Chairman, National Advisory Committee for Aeronautics; Col. T. G. Lanphier, jr., President, National Aeronautic Association and Chairman of the Committee; Fred Hamlin, President, Aero Club of Washington; LeRoy Whitman, Editor of the Army Navy Air Force Journal and Past President, Aviation Western, Association; C. S. Lossdon of Writers Association; C. S. Logsdon of the National Aeronautic Association was secretary of the Committee.

JOINS KOREA BAR

Col. Cameron F. Woods, USA, Senior Advisor to the Judge Advo-cate General of the South Korean Army, was admitted to the Korean Bar recently in ceremonies at Seoul. The presentation was made by Minister of Justice Lee Ho.

Colonel Woods, who works directly with Brig. Gen. Kim Wan Yong, Judge Advocate General of the Korean Army, also is staff Judge. Advocate General to Maj. Gen. Carl F. Fritzsche, USA, KMAG chief. Prior to his present assignments, Colonel Woods was Academic Director of the Army Judge Advocate General School at the University of Virginia.

The colonel was graduated from the University of Michigan in 1929 and the Harvard Law School in 1932. He is a member of the bar in Oregon and Illinois and has been admitted to practice before the U.S. Court of Military Appeals in Washington D. C. ington, D. C.

Air Force Report On Temporary Promotions

(Following is the text of the section of the November Air Force Personnel Newsletter reporting on temporary promotion prospects for all officers in the Air Force.)

TEMPORARY promotion of Air Force officers is governed by Section 515 (c), Officer Personnel Act of 1947 (OPA). Under the provisions of this Section, temporary promotions of "line officers" may be made whenever the authorized active duty strength of officers exceeds the authorized strength of the regular officer carps. (For the pur-

in

promotions of "line omicers" may be made whenever the authorized active duty strength of officers exceeds the authorized strength of the regular officer corps. (For the purpose of this article the term "line officers" is defined "officers other than those in the Medical Services and Chapiains.") The law requires that such promotions be made "on a fair and equitable basis, regard being given to seniority, age, and selection based upon ability and efficiency."

Our system endeavors to select the most mitable officers available consistent with promoting and maintaining the highest possible standard of efficiency and morale throughout the Air Force.

While the "centralized" system of selection (selections made by Headquarters USAF) insures that individuals compete against a common standard and that the fortunes of assignment are minimized, the question of administrative feasibility permits "centralized" selection only for the grades of colonel and lleutenant colonel. Selection authority for the lower grades normally is delegated to commanders of the larger major air commands.

The end of the temporary promotion program is foreseen in 1959 or 1960. Under present planning the grade requirements of the expanded Air Force at that time will have been met. Meanwhile, although the ceilings imposed by the Officer Grade Limitation Act of 1954 permit some promotions to field grades, they are relatively few. At the same time, the Air Force objective of selection to make the Air Force objective of selection for temporary promotion the most suitable officers available demands that selection be made from a wide zone of consideration. The natural result—stiff competition for the limited vacancies.

Eligibility Zones — Your entrance into zone of eligibility for consideration is zone.

The natural result—stiff competition for the limited vacancies.

Eligibility Zones — Your entrance into zone of eligibility for consideration is governed by active duty time in current grade as set forth below. Time in grade is computed as of 31 December of the fiscal year concerned and these requirements for the several grades are planned to remain constant.

TO Colonel Lt. Colonel TIME IN GRADE TIME IN GRADE

3 years as Lt. Colonel

3 years as Major

4 years as Captain

2 years as First Lieutenant Major Captain

Major 4 years as Major
Major 4 years as Captain
Captain 2 years as First Lieutenant
The outlook for the next few years for each of the grades follows:
COLONEL — Selections are made at Head-quarters USAF from officers nominated by major air commanders. There is no restriction on the numbers who may be nominated or promoted on an exceptionally well qualified (EWQ) basis, and thus the part which seniority plays in selection is overshadowed by ability. Selectivity ratios in the future will be on the order of 1/20 (one vacancy for each twenty eligibles, Air Forcewide). The average time in grade of lieutenant colonel for officers selected for promotion runs about 44 years.

LIEUTENANT COLONEL — Selections are made at Headquarters USAF from officers nominated by major air commanders. Commanders must recognize the seniority factor by nominating at least 40 percent of their nomination quota on a qualified beyond doubt (QBD) basis. Similarly, the selection board at Headquarters USAF must select at least 40 percent of the promotion quota on a "QBD" basis. Selectivity ratios, Air Force-wide, will be on the order of 1/15. Officers average a bit less than 6 years in grade of major when promoted.

MAJOR — Selection boards must select at least 60 percent of the promotion quota on a "QBD" basis. Selectivity ratios will vary between commands dependent upon the relative seniority distribution of officers who meet the eligibility criterion. The selectivity ratios, Air Force-wide, will be on the order of 1/10. Officers average 4½ years in grade of captain when they go up to major. CAPTAIN—Selection boards must select at least 80 per cent of the promotion quota on a "QBD" basis. Selectivity ratios will vary between commands dependent upon the relative seniority distribution of officers who meet the eligibility criterion. The selectivity ratios, Air Force-wide, will be on the order of 1/3. Those promoted average 3 years in grade of first lieutenant.

FIRST LIEUTENANT — Officers are promoted on a basis of full qualification effective

OFFICERS OTHER THAN LINE

Officers on promotion lists of the Air Force other than line officers compete among themselves for vacancies available to the particular component for each grade. This group includes Chaplains and officers of the Medical Serv-

crospects for all officers in the Air Force.)
lices (doctors, dentists, nurses, veterinarians, women medical specialists, and medical service officers). Selection to the grades of colonel, lieutenant colonel, and major for all components and to the grade of captain (for components other than medical, dental, and veterinary) is centralized at Headquarters USAF. The same restrictions on out-of-turn promotion as apply to selection of line officers apply to the selection of officers other than line. Medical, dental, and veterinary officers may be promoted to captain by the major air commander concerned upon completion of 20 months of active duty time in the grade of first lieutenant.

PROMOTION OUTLOOK FOR
WOMEN OFFICERS
Essentially all Air Force women officers have the same outlook for promotion as their male counterparts, with a few exceptions, largely dictated by law To be more specific, here is the outlook.

PERMANENT-REGULARS

PERMANENT-REGULARS

WAF—WAF and their male contemporaries are on the same promotion lists and complete equally for promotion in all grades through the grade of major. However, the number of WAF who may be promoted to permanent lieutenant colonel is limited to 10% of the total WAF officer authorization. At present 55 WAF permanent lieutenant colonels are authorized in the regular structure. Because of these restrictions the best qualified method of selection is used to fill vacancies. Further, no permanent promotions to grades above lieutenant colonel are authorized.

A plan has been developed for phasing permanent promotions of WAF to lieutenant colonel over the years until 1959 in order to avoid periods of "feast and famine." Under this plan, all eligibles with more than 18 years' promotion list service will be considered. Vacancies will approximate one-fourth the number of new eligibles who enter the zone of consideration during the year. Because of the restrictions on promotion of WAF officers to permanent grades above major, failure of selection for promotion to these grades does not constitute a passover for elimination from the active list.

Nurses and Women Medical Specialists—Although on separate promotion lists, promotion of nurses and women medical specialists to the grade of first lieutenant and capitain is the same as for all other categories of officers. Promotions to major and lieutenant colonel are to fill vacancies only, by the best qualified method of selection—and with no passovers.

best qualified method of selection—and with no passovers. Current long range plans provide that all captains who have more than 14 years' promotion list service will be considered for promotion to major. Because of the difference in authorized structures for these two categories, the ratio of promotions to the number of new eligibles entering the zone of consideration each year is 56% for nurses and 75% for women medical specialists. For promotion to lieutenant colonel, all officers who have completed one year in the permanent grade of major will be considered. Selection ratios as compared to the number of new eligibles who enter the zone each year are approximately 1/5 for nurses and 1/3 for women medical specialists.

TEMPORARY

TEMPORARY
WAF—WAF and their male contemporaries WAF—WAF and their male contemporaries are on the same promotion lists and compete equally for temporary promotion in all grades until they reach the grade of lieutenant colonel. The law specifies that at any given time there may be one, but not more than one, WAF officer on duty serving in the temporary grade of colonel. No officer may hold this grade for more than four years. At the end of four years an officer holding the temporary grade of colonel must either revert to the grade of lieutenant colonel, or if eligible, retire from active duty. Promotion to temporary grades above colonel is prohibited.

Nurses and Women Medical Specialists—Although nurses and women medical specialists are on separate promotion lists, administration of temporary promotions to the grade of captain, major, and lieutenant colonel is similar to that described for male "other than line" officers. Second lieutenants are promoted to first lieutenant upon completion of 18 months' active duty in the same manner as male "line" officers.

RESERVE

RESERVE

Since ROPA has been in effect only since I July 1955, promotion plans for all categories of personnel have not been fully developed. WAF, of course, will compete with male "line" officers through the grade of major. Future plans for promotion of WAF to lieutenant colonel, and promotion of nurses and women medical specialists, will be designed to provide for desirable career progression paralleling insofar as possible those for Regular women officers.

PHYSICIANS AND SPECIALISTS
Those women officers recently commis-

Rep. Brooks Finds NATO Housing "Woefully Inadequate"; Promises "Vigorous Action"

Terming present housing for U.S. forces in Europe as "unsuitable, inadequate, and too far beneath American standards," Representative Overton Brooks (D-La.), an active and leading member of the House Armed Services Committee, has promised that he will take "vigorous action" when the new session of Congress opens in January.

Mr. Brooks, whose 20 years' experience with military legislation makes him the next ranking member on the Committee after Chairman Carl Vinson, declared that he will recommend strongly the speeding up of Congressional programs for overseas housing, the use of overseas funds already appropriated to improve the housing situation, and vigorous application of the rental guarantee housing program.

nousing program.

Representative Brooks has been in Europe for a 30-day visit to U.S. military installations and personnel there. During his stop at USAFE headquarters he issued his strong statement on Service busing which was published in the

housing, which was published in the Wiesbaden Post.

In his statement, as printed in the WARCOM paper, Representative Brooks

Excellent in Germany

"Germany is the only country which I have visited where housing conditions for our troops may be considered good. Our barracks and our dependent quarters which have been built in Germany are excellent, and when the program is finished should be fairly adequate. "This contrasts definitely with conditions in other areas. France especially is a case in point. NATO housing for American troops in France is woefully inadequate and non-NATO housing is not much better.

Tribute to Wives

Tribute to Wives

"I want to pay tribute to the wives

of these servicemen who were willing to leave their comfortable homes in the U.S. to come half way around the world to be with their husbands and to unite the families. They are the type of womanhood of which America is proud. "At NATO bases I am critical of NATO's construction program, which works to the disadvantage of American troops, who come from great distances and require housing. Troops from areas within the country where the NATO base is located don't necessarily require the same housing as American troops,

base is located don't necessarily require
the same housing as American troops,
since they are within reasonable distances of their families and homes.
"The NATO construction requirements provide the facilities for a man
to fight, but fail to provide facilities for
him and his family to live.
"On non-NATO and NATO bases, Concress ought to speed up its overseas

gress ought to speed up its overseas housing program. The guarantee hous-ing program should be pushed.

Extend Guarantees

'In many instances the local economy, 'In many instances the local economy, when guaranteed occupancy for a period of years, will provide suitable quarters for dependents. It may be that the period of guarantee will have to be extended by Congress, but much can be done to improve this situation by vigorous application of present laws for guar-anteed housing.
"In certain countries which I visited,

foreign aid funds are available, either as counterpart funds or as direct appropriations. Where our people are in trouble for housing, this money already appropriated should be used to take care of their needs.

"In Yugoslavia there is money available and the housing situation is critical for both our military and non-military personnel. I hope some program can be worked out in this and in other areas."

Army Transportation Corps Tests Mobile Overland Conveyor System at Ft. Eustis

Tests of an overland conveyor system designed to transport military cargo faster, more economically and with less manpower, are being conducted by the Army Transportation Corps' Research and Development Command at Ft. Eustis, Va.

First projected use for the new carrier is the movement of cargo from unloading docks to storage or dispersal points located from one to ten miles in-

land.

A wide variety of equipment and supplies can be transported. Conveyor transportable cargo includes drums of fuel; palletized general cargo, including ammunition, engines, food, medical supplies and clothing in unit loads as great as 3,000 pounds each.

Maximum capacity of the present conveyor system is 270 tons per hour. The system includes mainline and branch line conveyors with means for switching cargo from one to the other while in transit. The loads are conveyed on steel carriers mounted on small wheels which run on tracks. These carriers are joined run on tracks. These carriers are joined together to form a continuous line re-sembling a caterpillar track on a tank

tractor.
The conveyor is made in sections that The conveyor is made in sections that can be easily stored or transported and set up quickly in the field. It will operate over rough terrain and up grades as steep as 27 percent, as compared with a maximum grade of about 9 percent for trucks and 3 percent for narrow gauge railways. It can follow a straight path or be curved to avoid obstacles.

The advantages of the overland conveyor over other methods of moving cargo from port areas to interior locations include the following:

a. Can operate at full efficiency in fog. dust,

a. Can operate at full efficiency in fog, dust, darkness and other conditions restrictive or hazardous to other types of surface transportation.

b. Less affected by slowdown and stoppages caused by human fatigue and illness since it

runs automatically and requires no drivers. e. Requires less manpower and costs less noney to operate.

d. Easily camouflaged, reducing vulnera-bility to attack.

bility to attack.

e. Causes less damage to cargo because load is handled gently.

f. Does not require back haul and eliminates confusion of 2-way traffic.

g. Requires little site preparation. One pass of a buildozer would generally be enough to clear a path.

The 1,000 foot prototype of the new conveyor system undergoing tests by the Transportation Research and Development Command was developed by Hewitt-Robins Incorporated of Stamford, Conn. The conveyor was built in Hewitt-Robins' machinery manufacturing plant in Passaic, N. J.

U. S. Army

ATTC Hdqs. Reorganized; **New Assignments Made**

The Headquarters of the Atlantic Transportation Terminal Command at Brooklyn, N. Y., previously organized with General Staff sections similar to an Army post, has been reorganized as a directorate-type organization.

Concurrent with the changeover, several additional sections were established new job assignments an-

Hugh Thompson has been named chief of the General Management Engineering Section; Michael Keller was named chief of the Budget and Programs Section, and John J. Ryan has been appointed Chief of Civilian Personnel Section. The two latter offices were departments of staff sections under the old organization.

Col. Donald M. Jacques, USA, formerly G-2, has been named Staff Director of Administration, and his Intelligence Officer, Maj. Charles W. Ker, USA, has been named Chief, Intelligence and Security Section. Lt. Col. Peter T. L. Black, USA, who was Deputy G-2, now is Chief of Transportation Section.

Col. Jonthan M. Michael, USA, who was G-3, and Col. James N. Dobbie, USA, who was his assistant, have been named Staff Director of Operations and Chief of Cargo Movements Section, respectively.

Other redesignations were the Engineer, Ordnance, Quartermaster and Sig-nal Officers who have been named as Chiefs of their respective Sections.

Col. Fields To Formosa

Col. William R. Fields, Infantry Center Quartermaster at Ft. Benning, Ga., has received an assignment on Formosa.

Korea Civil Command

The Korea Civil Assistance Command, headed by Brig. Gen. Mercer C. USA, will be inactivated 30 Nov.

The command's technical advisory functions in implementing the economic rehabilitation of Korea in support of approved air programs are being assumed by the Office of the UNC Economic Co-

General L. L. Lemnitzer, USA, Com-mander in Chief of the Far East and United Nations Command, said the KCAC was being inactivated because the mili-tary need for maintaining a major civil affairs organization in Korea has been terminated by the gradual shift from immediate relief activities to a long-range economic rehabilitation program.

KCAC was established in 1953, as a successor organization to the UN Civil Assistance Command, Korea (UNCACK), with the mission of "preventing disease, starvation and unrest" so that combat operations could be carried on without disruptment by rear area developments.

TEST PROFICIENCY TEST

Specialists are attempting to develop a "flawless proficiency test" for soldiers at Ft. Dix, N. J., who have completed advanced infantry training. The test is designed to examine the degree of training reten-tion of each basic soldier.

The examination experts will at-The examination experts will attempt to make the test as free from ambiguity as possible to provide easy detection of any weak spots in the tests. The work is being done by the Human Resources Research Office in Washington, D. C.

SERVING 48 STATES . CANADA . ALASKA . HAWAII . PUERTO RICO

Will Be Inactivated

The command's technical advisory ordinator.

The civilian and military specialists of the KCAC, who total approximately 190, will be transferred to or placed on temporary duty with the Economic Coordinator. The military specialists eventually will be replaced by civilians.

FT. BLISS OF '48. After being relieved of their posts by the Honor Guard, soldiers armed with Springfield muzzle-loading rifles and clad in the two-tone blue uniforms, yellow scarves, and slouch hats of the 1848 era, stand in formation in front of the Replica of Old Fort Bliss. Mounting the guard was held in the Nov. 6th program commemorating the 107th Anniversary of Ft. Bliss, rededicating the Replica of Old Fort Bliss, and opening the new Army museum in the Replica.

Ft. Bliss Has Triple Ceremony on 107th Year; Dedicates Museum in Replica of '48

Three-fold ceremonies at Ft. Bliss, ex., marked observance of three events of interest both to the post and to the adjacent civilian community.

The three were the 107th anniversary of the orders establishing the post (cele-brated one day in advance of the actual anniversary date, 7 Nov.), the re-dedica-tion of the Replica of Old Ft. Bliss which was presented to the Army by citizens of the City and County of El Paso, Tex. at the Ft. Bliss Centennial Celebration in 1948, and the formal dedication of the new Army Museum set up in the Penlice.

An estimated 2500 persons attended the ceremonies which opened with the laying of a commemorative wreath at the Memorial Flag Pole by Daniel Catania of El Paso, president of the 1st Cav-alry Division Association. The wreath The wreath presented by the El Paso Chamber was presented of Commerce.

Four battalions of troops from the First Guided Missile Brigade marched in the anniversary review on Noel Field, the anniversary review on Noel Field, with music by the combined 62nd and 424th Army Bands.

Highpoint of the review was reading of the War Department General Order No. 58, dated 7 Nov., 1848, authorizing

establishment of the post that is now Ft.

Following the review, scene of the ceremonies shifted to the little adobe Replica of the Ft. Bliss of more than a century ago.

At the Replica, soldiers in the two-tone blue uniforms and slouch hats of the 1848 era walked their guard posts. In a ceremony symbolic of the change from old to new, these guards were re-lieved by soldiers in the olive-drab uniforms and helmets of the crack Honor Guard of Ft. Bliss today. Changing of the guard marked the opening of the re-dedication and dedication ceremonies.

Maj. Gen. Paul W. Rutledge, USA, Ft. Maj. Gen. Paul W. Rutledge, USA, Ft. Bliss commander, welcomed the guests. He said, in part, "We have founded this Museum in order that we do not forget the hardships and the distinguished service of so many who have served be-fore us and so that future generations may enjoy the sterling history of this post and the Southwest."

Mr. Chris P. Fox, representative of the Replica Citizens Committee of El Paso

and one of the active workers in the original construction and dedication of the Replica, made the re-dedication ad-

Army "Early Out" Plan Starts 12 December

Army enlisted men and officers, whose release from active military service normally would occur during the Christmas-New Year period, will, with some exceptions, be separated between 12 and 21 Dec. in order that they may spend the helidays at home.

Dec. in order that they may spend the holidays at home.

The release policy applies only to personnel scheduled for separation who are in the continental U. S. or its territories during the 12-21 Dec. period. Early departure from overseas stations to meet provisions of the policy is not authorized. Officers and enlisted men who return from overseas and are scheduled for separation during the holiday season (22 Dec. through 2 Jan.) will be separated as soon after arrival as possible. To preclude overseas returnees from reporting for reassignment during the Christmas holiday period, extension of leave is authorized to include the utilization of excess leave for the holiday period if necessary.

Enlisted personnel eligible for separa-tion under provisions of the policy will not be retained in service beyond 21 Dec.

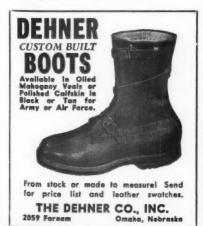

not be retained in service beyond 21 Dec. merely because their records have not been received, but will be separated by use of temporary records.

Exceptions to the policy are officers to be relieved on specific dates under direction of the Department of the Army; non-regular Medical Corps, Dental Corps and Veterinary Corps officers who have not completed 21 months active duty prior to release; enlisted personnel of Reserve Components desiring to complete Reserve obligations, who may be retained until expiration of their terms of service; enlisted personnel inducted or enlisted until expiration of their terms of service; enlisted personnel inducted or enlisted under provisions of the Universal Military Training and Service Act, who are eligible for release prior to completing two years' active military service, but who must complete 21 months' active duty, and Regular Army personnel whose reenlistment bonus and accrued pay leave would be adversely affected by an early release.

Heads Out-Patient Service

Col. Philip Wallace Mallory has been named Chief of the Out-Patient Service at Walter Reed Army Medical Center, Washington, D. C.
Since 1954, Colonel Mallory has been

with the Medical Information and Intelligence Division of the Army Surgeon General's Office. Prior to that he was Surgeon for the Army Section of the U. S. Military Commission to Brazil.

15th AAA Group Host To Service Visitors

The 15th AAA Group, which is responsible for the antiaircraft defense of Boston, recently conducted a tour of its new NIKE site for civil and military dignitaries. The 15th is commanded by Col. David B. Routh.

The host battalion for the opening ceremonies was the 514th AAA Missile Battalion commanded by Lt. Col. Bertram Ellis. Among the visitors were Maj. Gen. Nathaniel A. Burnell, Commanding General of the 1st AA Regional Command; Brig. Gen. Charles B. Duff, Commanding General of the 52d Brigade, Ft. Wadsworth, N. Y.; Col. Van Bibber, representing General Herren, Commanding

32,815 Marine EM Receive Grade Hike

The Marine Corps has authorized promotions for almost 33,000 enlisted men.

Promotion boards named 100 technical sergeants for advancement to master sergeant and 715 staff sergeants for promotion to technical sergeant. Those named for six stripes will be advanced this month. New technical sergeants will receive their Certificates of Appointment in three increments during October, No-vember and December.

Promotions also were approved for approximately 3,700 sergeants, 17,076 corporals and 11,597 privates first class.

During the period from 25 Oct to 8 Nov., promotions with a date of rank of 1 Oct. will go to Pfc's with a cutting score of 118 and to corporals with 131.

Pfc's with cutting scores of 113 and corporals with 123, will receive promo-tions from 15 to 30 Nov. with date of rank to 1 Nov.

Promotions for Pfc's with cutting scores of 110 and corporals with 108 will be effected from 1 to 15 Dec. Date of rank will be 1 Dec.

Sergeant to S/Sgt promotions also will Sergeant to S/Sgt promotions also will be split into these three increments. The increment in which an eligible sergeant is promoted will be based on how high his cutting score is above the minimum requirement for his functional field.

USMC Studies New Type Cold Weather Helmet

The Marine Corps soon may adopt a new type of protective head-gear which will replace the steel helmet in coldweather areas.

The decision to design and test a new style helmet was made as a result of experiences in Korea where the famillar tin-hat was found unsuited for use dur-ing cold weather operations. With the wind whistling around their ears, Marines were unable to pull the hoods of their parkas over their heads unless they had garments several sizes too large.

The new style protective helmet will probably be made of several layers of impregnated fiber-glass cloth and doron plates like the Marine Corps' body armor. The cold weather helmet is designed to fit tightly around the ears.

The Marine Corps is also testing modified versions of body armor. As one Marine officer puts it, "the Corps is aim-ing at head-to-toe body armor for the infantryman.'

Navy Policy Permits 30 To 330 Day Re-Ups

Active duty Navy enlisted men are now permitted to extend their enlistments for periods of less than a year.

Under the new policy, EM may sign up for periods as short as 30 days and any multiple of 30 up to 330 days. Extensions or reextensions of enlistments, however, are limited to those who: 1. are serving on a ship or with a unit scheduled or engaged in a cruise on distant duty; and, 2. have insufficient active duty time to conclude the cruise.

The policy applies to Reserve and Fleet Reserve EM, as well as to Regulars.

Please send in notice of your change of address promptly.

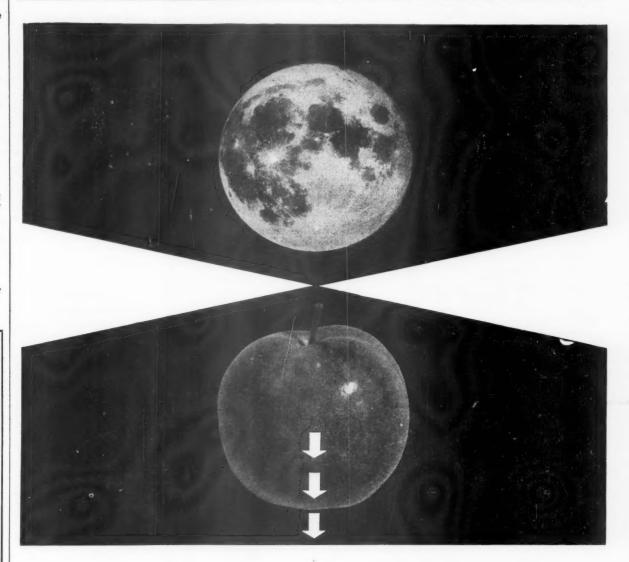

Army Navy Air Force Journal 19 Nov. 1955 (Vol. 93, P. 343)

Navy EM Wins PhD

HM1 Albert D. Jenkins has acquired three scholastic degrees, B.S., M.S. and Ph.D, during his 13 years as an enlisted man in the Navy.

His Ph.D degree was taken in psychology and was conferred, as was his other degrees, by the University of Edinburgh in Scotland. Dr. Jenkins currently is serving aboard the submarine U.S.S. Ray.

Col. Doleman Asst. CofS
Col. Edgar C. Doleman, USA, has been named Assistant Third Army Chief of Staff G-3 (Plans and Training). He succeeds Col. Earl F. Holton, who has been acting in that capacity since last August.

PROBLEM: GRAVITY

Interested in it? So are we!

For part of the work in advanced design at Martin includes an overall search into the basic laws of the universe - probing the unknown in every field that relates to airborne systems.

As a result of this far-reaching program of exploration - which includes the establishment of an independent laboratory for pure and advanced research - exciting new long-range developments have created exceptional opportunities at Martin on projects of the highest priority and importance.

Opportunities such as these are an engineer's dream !... If you are one of the many creative engineers who are lost in large organizations, anchored to static, non-creative jobs - ceiling zero, visibility zero - you'd do well to look into the Martin story.

U. S. Air Force

Training Load Raised At AF "Gateway"

Arrival of basic airmen at Lackland AFB, Tex., will be increased approximately 35 per cent beginning in the next 30 days to 6000 per month.

The increased training load is expected to continue through fiscal year 1957. The San Antonio base heretofore re-ceived approximately 44 per cent of new

Air Force enlistees; it will now be allo-cated approximately 60 per cent. Personnel officers said additional base party personnel have been requested to support the expanded load.

Lackland officials said there is little or no connection between the expansion in receipts and an abbreviation in the Air Force basic training schedule which has previously been announced to take effect 2 Jan.

In the basic training changeover, qualified airmen will be sent either to duty assignments or Air Force technical schools after only six weeks at Lackland instead of 11 weeks now given all basic trainees. They will complete the final phase of the basic course at the new bases.

The remaining enlistees will remain

The remaining enlistees will remain at the Gateway base for the full course.

SAC Reups Up

More than twice as many airmen re-enlisted in SAC this past September than during September, 1954. There were 1899 immediate re-enlistments during Sep-tember of this year for a rate of 36.7 per cent, as opposed to the previous year's rate of 22.9 per cent for 700 re-enlistments. The September rate was slightly lower than last August's rate.

Please send in notice of your change of address promptly.

10 AROTC Chiefs Meet On Purdue Campus

Commandants of Air Force ROTC units at 10 colleges and universities in Indiana and Michigan attended a conference last week at Purdue University, Lafayette, Ind. Col. Harold T. Babb, Pro-fessor of Air Science at Purdue, was

Brig. Gen. John C. Crosthwaite, Vice Commandant of the Air Force ROTC program attended. Accompanying Genprogram attended. Accompanying General Crosthwaite from AFROTC Head-quarters, Maxwell AFB, Montgomery, Ala., were two staff officers, Lt. Col. James R. Witte, and Captain William Reitz, USAF.

G. Reitz, USAF.

Visiting Professors of Air Science included Lt. Col. Robert E. Jarrell, Butler University; Col. John O. Gross, Indiana University; Col. Milton M. Towner, University of Notre Dame; Lt. Col. Frederick W. H. Wilson, Ball State Teachers College; Maj. Burtice O. Snyder, De-Pauw University; Lt. Col. James F. Daugherty, Evansville College; Col. Glendon V. Davis, Michigan State University; Col. James J. O'Shea, University of Detroit; Col. William H. Parkhill, University of Michigan; and Lt. Col. Milton A. Campbell, Wayne University, Detroit, Michigan. Detroit, Michigan.

Accompanying the Professors of Air Science from Michigan State University and the University of Michigan were Lt. Col. Oliver E. Fowler and Lt. Col.

Col. Onver E. Fowler and Lt. Col. Charles M. Callis respectively.
Lt. Col. Leo G. Fradenburg and Captain James B. Woodruff from Purdue aided Colonel Babb in the conduct of the conference.

Win Singing Honors

The Silver Stars singing group at Griffiss AFB, N. Y., has won top honors in two singing categories in an Air Mate-riel Command-wide contest.

The group took first place in both spiritual and modern singing. It now will enter the all-Air Force competition which will be judged 1-10 Dec. Leader of the group is Lt. Clarence Gilmore.

2D LT. HAROLD K. SHEARER, USAF. (right) was personally thanked by three Air Force Generals for saving three pilots and their jets from almost certain pilots and their jets from almost certain disaster. He is receiving the Air Defense Command's "We Point with Pride" plaque for a "job well done" from Brig. Gen. James O. Guthrie, USAF, 29th Air Division (Defense) Commander. The quick thinking aircraft director at the Divisor's "Galet Aircraft Control and Warnsion's 801st Aircraft Control and Warning Squadron, Malmstrom AFB, Mont., received letters of appreciation from General Earl Partridge, Commander of the Air Defense Command, and Maj. Gen. Jarred V. Crabb, Central Air Defense Force Commander.

SAC "BOMBS" PAPER TARGETS

Enough paper work to fill more than 87 freight cars, 260,755 cubic feet, has been disposed of by a SAC records management program that started in 1951, Col. J. H. S. Rassmussen, USAF command adjutant, reports from Offutt AFB,

This is almost twice as much as the 146,893 cubic feet of records now in the command's current files.

Mr. Charles Guthrie, records management officer, estimated that, if the records disposed of during the five year period by destruction and retirement were still in SAC's current files, it would have cost the command \$2.9 million in five-drawer file cabinets for additional storage.

WAF Clarinetist Completes Correspondence Course

A/IC Constance E. Davis, who plays a clarinet in the WAF Band, has become one of the few WAF ever to complete the Air University Extension Course Institute Officer Candidate correspondence course at Lackland AFB, Tex.

Airman Davis holds a bachelor degree in Music Education from Florida State University.

GROUP TO WING

The 1708th Ferry Group, com-manded by Col. Tarleton H. Wat-kins, USAF, has been designated the 1708th Ferrying Wing at Kelly AFB, Tex. It is assigned to the Continental Division of MATS.

The Wing ferries all types of Air Force planes on a global basis, in-cluding the delivery of aircraft from manufacturer and repair de-pot to Air Force bases around the world, delivery of aircraft over to NATO countries and to Central and South American governments.

SAC Reactivates Bomb Wing In Florida

The 379th Bomb Wing has been reactivated by the Strategic Air Command as the first of two B-47 medium bombardment wings to be assigned to Homestead

AFB, Fla.

Next June, the 19th Bomb Wing will be transferred from Pinecastle AFB, Fla.

to Homestead.
With the completion of the two-wing build-up at Homestead will come the establishment of the 823d Air Division headquarters. The projected number of strat-ojets assigned to the 823d will be 90 when they reach full strength.

they reach full strength.

The 379th Bomb Wing, which carried the "group" designation in WW II, had a distinguished bombardment record in the air war against Germany. It was activated in May 1943 under the 4th Bombardment Wing, and took part in its first mission on 13 May 1943.

Commend Col. Prather For Scholastic Work

Lt. Col. Jack F. Prather, USAF, who is assigned to the Office of the Deputy Chief of Staff, Comptroller, at Air Force Headquarters, Washington, D. C., recently was commended by the Air Force for outstanding scholastic achievements dur-ing a recent tour of duty at Ohio State

University.

Colonel Prather, carrying an average of 21 hours of course work each quarter, obtained a degree in less than two years. In addition, he maintained an overall average grade of 3.87 on a 4.00 basis.

SAC Arctic Teams Aid Refueling Units

The Strategic Air Command now has five Arctic research and indoctrination teams trained to prepare aerial refueling

teams trained to prepare aerial refueling units for TDY deployment at Arctic bases, according to Col. Edward A. Perry. USAF, chief of SAC's training division. The sub-zero training teams, stationed at Westover, Mass., and composed of a pilot, observer, and three maintenance NCO's, were selected last spring. They were trained at the Air University, Maxwell AFR Ala, by the Arctic Desert. well AFB, Ala., by the Arctic, Desert Tropic Information center, AF Personnel and Training Research Center, and the

Academic Instructor's courses.

When a SAC refueling unit is alerted for Arctic TDY, a Westover team is assigned to the unit to assist refueling crews and maintenance men in all aspects of living and working in the Arctic; and to conduct research in related problems
The indoctrination teams stay with the

unit during its movement to the Artic base and remain with it for approximately two weeks.

Fifth Army Commander Accepts Gift Of Bell for Air Force Chapel in Pacific

The gift of a locomotive bell for an island chapel in the South Pacific has been formally accepted by Lt. Gen. William H. Arnold, USA, Commanding General of Fifth Army, at Chicago on behalf of the Air Force.

liam H. Arnold, USA, Commanding General of Fifth Army, at Chicago on behalf of the Air Force.

The presentation was made by President of the Illinois Central Railroad, in his office at the Central Station, Roosevelt Road and Michigan Avenue, Chicago. Col. William J. Reiss, USA, Chief of Fifth Army Chaplains, also participated in the ceremony.

The bell, which originally went into

pated in the ceremony.

The bell, which originally went into service in 1909, will be installed in the quonset chapel of the U.S. Air Force Base on Johnston Island. The chapel is shared by both Catholics and Protestants. The base, located on an extinct volcano in the midst of a deep ocean ex-

panse, has a population of approximately 700. Johnston Island is little more than a mile long and a quarter of a mile wide.

The request for the bell was relayed to President Johnston by the Rev. Mr. Amos Thornburg, who is on a ministerial mission for the Air Force in the Far East.

Fifth Army arranged for the shining bronze bell to be flown from Chicago's O'Hare International Airport to Travis Field, San Francisco, where it will be reloaded and flown to Johnston Island.

GREETED AT STAN-FORD—Col. Ralph W. Keller, Professor of Air Science at Stanford University, Calif., extends an official welcome to the new officers on his Air Force ROTC staff. Left to right are: Capt. Michael A. Hirrel, WO Gordon J. Dettlaff, Maj. William R. Stobie,

BIG LOAD • BIG LIFT BIG PERFORMANCE ARE BUILT INTO FAIRCHILD C-123

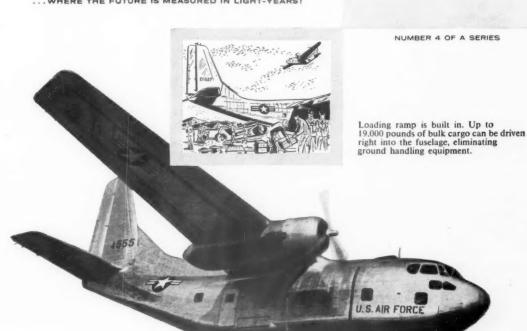

Maximum load-carrying capacity and workhorse durability are just two of the many reasons why the Fairchild C-123 Assault Transport is ideally suited to tough jobs in all combat airlift operations.

Equipped with Fairchild J44 turbojets on each wing-tip, the C-123 is provided with a power package of 2,000 lbs. extra thrust to meet any critical take-off or flight requirement.

In front line operations, on any terrain, under the most difficult conditions, the Fairchild C-123 gives big load, big lift, and big performance where and when utility and logistics support is needed.

A Division of Fairchild Engine and Airplane Corporation.

Lands or takes off in less than 10 times its own length. The Fairchild C-123 operates on any terrain with only 600 feet of field space.

Fairchild J44 turbojet engines give added power thrust to the C-123, providing an extra margin of safety for any emergency condition.

Test and Research. The view of the Air Force's ARDC gigantic test center at Tullahoma, Tenn., afforded by this week's first national press inspection there (see story on next page), should serve to spur Congress and the nation to reflect on what steps must be taken to provide aeronautical research with the tools necessary to stay in the forefront of development.

The facilities built and building at the Arnold Engineering Development Center are the best that the current stage of the art can devise. Their performance, and the power and tools necessary to operate them, are startling and stagger the imagination of even the well informed layman. Air that starts through a test section at pressures up to 150 atmospheres and temperatures up to 1500 degrees Fahrenheit drops to 1/200th of an atmosphere and minus 400 degrees after it has rushed through the test chamber at speeds up to ten times that of sound.

But it must be kept in mind that these great AEDC facilities are not designed nor used for research—they are primarily for test and development. They are for the use of manufacturers and designers of engines and missiles. By and large the articles put into them for test are those nearing the production stage.

If we are to advance at the rate necessary for defense and survival, research must be collecting data far ahead of the test and development stage. The time gap between the discovery of new data by research, and the design and production of resultant articles for the test and development stage is so great that it is imperative that research's facilities be well in advance of test facilities.

Present research tools, such as the shock tube, are capable of gathering some data at speeds up to Mach 20, not as a sustained flow but for fractions of a second. Scientists and engineers can see well beyond that point and are working on devices and systems to achieve it. But this takes

The great advances made by the facilities at Tullahoma, and the invaluable contributions they will make to the national defense, should serve to emphasize the necessity for providing research with the tools and staffing to probe deeper into the unknown and come up with even more advanced material for the testing laboratories.

Hope For Housing. What we hope is to be typical of the reaction of the many Congressmen who have visited military installations abroad this Fall, is that of Representative Overton Brooks (D-La). As reported from Germany this week (see story page 3 of this issue), Mr. Brooks has seen at first hand the sorry type of housing afforded the families of American military men abroad and is determined that something should be done about it.

Mr. Brooks seems to be shocked at the construction provided at NATO bases. In fact, these are skeleton bases, designed to provide only the bare necessities of fighting units. They do not provide any of the housing and family facilities American personnel are accustomed to. Even the barracks and their positioning on the bases are not up to American standards. When we take these over for operation, much must be done.

Representative Brooks was quick to note this deficiency, as well as to see the deplorable conditions under which our families must live in England, France and North Africa. He has expressed his determination to bring the matter up in Congress and to fight it through to a suitable conclusion.

There has been considerable criticism in the daily press and general magazines of the so-called ARMY · NAVY · AIR FORCE

junkets of American Congressmen abroad. But we think that Mr. Brooks is rather typical. Most U. S. Congressmen will see how their people are living abroad, they will recognize readily what is needed to bring them up to acceptable living levels, and they will do something about it.

Unified Food Supply. The Department of Defense selected the easiest approach to its proposed system of unified supply of common-use commercial type items by picking the Army to handle the food supply for all of the Armed Services.

The fact is that the Army's Quartermaster Corps has long been a major factor in the pur-

chase and distribution of food for all of the services.

Its new official assignment encompasses the entire subsistence supply field, from research and development through issue or disposal, including cataloging, standardization, requirements determination, procurement, production, inspection, storage, distribution, transportation and maintenance. This sounds like a very large order, but the fact is that the Army Quartermaster Corps has been performing most of these functions in many areas for the Navy and Air Force as well as for the Army.

The new system will simplify the bookkeeping for the Army Quartermaster Corps as well as for the other services. But it will not add too many problems to those the Quartermaster Corps already has been handling so efficiently.

The real problem for the proposed Single Manager Commodity Assignment System will come when the Defense Department decides to extend the plan to fields not so well prepared.

IN THE JOURNAL

10 Years Ago — The sixth consecutive week of hearings before the Senate Military Affairs Committee on the proposed single Department of Defense, was marked by a second sharp clash of views between civil chiefs of the War and Navy Departments. Precipitating the public expression of differences was the testimony given by Lt. Gen. James Doolittle, AAF, in which he branded as "hypocrisy" the contention that effective unity of command in war can be achieved without having unity of control in peacetime. In protest of this statement, Secretary of the Navy For-restal addressed a letter to Secretary of War Patterson, who replied in defense of the Air Force General.

50 Years Ago — Press dispatches from Washington state that three carloads of papers, documents, maps, parchments and charts embracing a part of the report of Maj. Gen. Leonard Wood, U.S.A., former Governor of Cuba, and relating to the American occupation of that island, have been sold to a junk

90 Years Ago — It is stated from an official source that the Army of the United States has not been reduced as low as seems to have been supposed. Its full and available strength exceeds 180,000 men, of which about half is on each side of the Mississippi.

READERS' VIEWS

(Letters to the Editor must have author's name and address, but name will be omitted on publication if writer so states. Longer letters may be extracted for publication.)

Confusing Policies

Editor, THE JOURNAL:
I have followed very closely during recent months articles and com-ments in your publication on the subject of Army officer promotion policies. It is with a special and highly personal interest that I have carefully scrutinized letters from fellow officers which you have seen fit to publish

No single condition or field of significance has so incensed me in my entire career of almost 14 years as the current unfair, ridiculous system or policies pertaining to Army officer promotions. Those officers whose letters I have read have every right and reason to feel that they have been treated unfairly or un-justly. To date, no indication of any form of corrective action contemplated has come forth from Depart-ment of the Army. Indeed, the only published reaction at all on this subject was an admission to the effect that "things" were not entirely sat-isfactory from D/A G-1's viewpoint; furthermore, the article reflected the attitude at D/A G-1 level that they were planning no corrective action. but expected condiitons to continue for some time to come.

The thousands of integrated offlcers (including those who were in-tegrated as a result of successful completion of competitive tours) who are literally losing credit for years of extended active duty are justifiably bitter and resentful. I am somewhat a typical example of this rather large group—my loss, because I was integrated in the 1946-47 phase, does not amount to the extended

period that competitive tour officers are experincing. I was actually com-missioned on 8 July 1943; because my twenty-first birthday did not occur until 29 July 1944, I was given that as my basic date for promotion pur-poses on the permanent promotion list. Now, I am informed by D/A that I am credited only for service from that date (29 July 1944) for temporary promotion to Major. Offi-cers who graduated from the USMA cers who graduated from the USMA in 1944, however, under wartime acceleration, are credited from the date of graduation, regardless of age—some actually have basic dates prior to their twenty-first birthday.

It may seem ridiculous to those not well-versed in the confusing policies which currently attend the pro-motion situation that a Reserve officer on extended active duty receives full credit for all active commis-sioned service, but a Regular may well receive credit for considerably less than this full period of active commissioned service. Such is the case, however, in the current cycle of temporary promotions to Major and Lt. Colonel. To complete the explanation, I must state that those Regular officers whose age entitles them to greater service credit than their actual commissioned service would justify do benefit from this policy—in other words, age, not ac-tual service, determines their eligibility. If anything, why should not the policy for Regular officers be whichever of the two is greater—socalled "constructive service" for age or actual commissioned service if such service exceeds the former?

D/A's official attitude is that one

Regular officer having the same temporary date of rank as another should not take precedence over the other, if in fact he is junior on the permanent list. That policy applies even though the junior in permanent rank may have months or years greater active commissioned service. Of course, those officers far junior who were simply fortunate enough by chance to be in Korea during the initial phase of hostilities and received a promotion sooner than they otherwise would have made it have been and will apparently continue to be promoted much ahead of their seniors and contemporaries.

The present system is so ridicu-lous and unjust as to seem almost incredible. The current wide variance in grade relative to age and actual service certainly must be of concern to Department of Army G-1. When I have attempted to explain the Army's officer promotion system to my friends in civilian life I have met with reactions ranging from mild shock to total consternation. To many of them it seems unbelievable that one officer with less actual service and experience could be pro-moted over another solely because of his being one or two years older. And yet, that is most certainly the case. I personally know three offi-cers, two of whom served under me, that were promoted to Captain (permanent) in May 1950 and, based on their date of rank as Captains, to the temporary grade of Major in July 1954. All three were not only junior to me as 1st Lts. by periods ranging from six months to almost

TULLAHOMA, TENN.

ANEW type jet engine, designed for advanced supersonic military aircraft roars at high speed in a test cell simulating conditions of actual flight at

Attached to it are some 500 or more instruments and connections recording temperatures, velocities, presures, etc. The information they gather is being carried off to a complex automatic data adduction systems so that originary conreduction system so that engineers conducting the tests may be informed of the results almost instantaneously.

Suddenly

Suddenly something goes wrong. The engine virtually explodes, its sleek shape is twisted almost beyond recognition and pieces fly in all directions around the test chamber. This actually

test chamber.
This actually happened in the T-2 test chamber of the Engine Test Facility at the Arnold Engineering Devel-opment Center here at Tullahoma, a short while ago.

LT. GEN. POWER Commander, ARDC

The incident illustrates dramatically what the Air Force and its Air Research and Development Center, under whose command the AEDC comes, mean when they say the Center was constructed to save time, men, material and money.

Saves Time, Money & Men

In this specific incident there was some loss. The engine cost perhaps \$300,000 (it belonged to a manufacturer for whom it was being tested). The test chamber was damaged—but not a great deal for it was put back into action again in four days at a cost of only \$1,400.

S1,400.

On the other hand before AEDC's Engine Test Facility went into operation, the only way to give similar tests to a new jet was to put it in an airplane and fly it. Under those conditions such a disaster would most surely have meant the death of a highly skilled test pilot and the complete loss of an airplane which might have cost upward of a million dollars.

Furthermore, when this engine went

Furthermore, when this engine went to pieces in the test chamber it left behind a complete and detailed record of the stresses and strains put upon it of the stresses and strains put upon it and how it reacted to them. From this information and analysis of it by the engineers, the manufacturer was able to make changes to overcome the defect and from it there will most likely emerge a high performance engine that will operate efficiently and safely in an advanced design fighter or bomber for the nation's deefnse.

The AEDC, which is one of ten centers of the Air Research and Development Command, grew out of an idea of the late General of the Air Force H. H. Arnold, who, in 1944, requested a group headed by Dr. Theodore von Karman, to investigate the requirements for future

headed by Dr. Theodore von Karman, to investigate the requirements for future research and development facilities. When Congress approved the Unitary Wind Tunnel plane in 1949 AEDC was allotted certain tunnels and facilities fitting in with the overall plan which included the tunnels operated by the National Advisory Committee for Aeronautics and some of those operated by the research departments of large colleges and universities.

Its development, construction and operation represent a gigantic military-civilian combined effort.

Built by Army Engineers

The direction, scheduling, planning and budgeting is done by an Air Force staff under the command of Maj. Gen. S. R. Harris, USAF. A graduate of the U. S. Military Academy (class of '26), General Harris has been a pilot since

B-Minor	50 in. diameter	4.5 to 10°	Testing starts in 1956

^{*}Approximate or estimated

1927. His career has covered a great deal of technical work, including that of test pilot, engineer, and as Director of the Technical Services of the Army Air Force Headquarters in the years from 1939 to 1942. Since then he also has served as Direc-tor of Plans and

Maj. Gen. Harris Commander, AEDC

tor of Plans and Programs at ARDC and as ARDC Chief of Staff. His Deputy Commander is Col. William L. McCulla, USAF.

Both the technical and non-technical construction at the Center is supervised by the Army's Corps of Engineers which in January 1950 set up a special office—Tullahoma District—for the purpose

Col. Cox Dist. Engr. Tullahoma Dist.

Present District Engineer on the project is on the project is Col. L. E. Cox, CE, USA, who reported for duty there in August 1953 after having served as Chief of the Construction Branch, U.S. Army Europe. Army Europe. From 1947 to 1950 Colonel Cox held the impor-tant post of As-sistant Engi-neer Commis-sioner for the

District of Columbia.

District of Columbia.

The only other officer at the District is Maj. R. Wilson Neff, CE, USA, Colonel Cox's assistant. But the District employes about 180 civil service specialists and has under its direction

about 800 contractors' employees.

Colonel Cox estimates that the support facilities for the Center, streets, roads, utilities, buildings, etc., are now between 90 and 95 per cent completed. The operating facilities, wind tunnels, etc., are about 65 per cent completed. The ground work of the project is so far advanced that it is estimated they will be able to open one new facility every six months for the next three every six months for the next three

Operation and Maintenance of the Center is the function of ARO, Inc., a private corporation formed in Ten-nessee for the sole purpose of performnessee for the sole purpose of performing these duties under contract with the Air Force. ARO is a subsidiary of Sverdrup & Parcel, Inc., a St. Louis architectural-engineering firm which did the preliminary planning and site survey work on AEDC and has designed many of the technical facilities at the Center. President of the firm is Maj. Gen. L. J. Sverdrup, a reserve officer in the Army's Corps of Engineers, who served as Chief Engineer in the Southwest Pacific during the war. In 1947 he was made com-

was made commanding general of the 102d Reserve Infantry Division.

Managing Director of APO is rector of ARO is Maj. Gen. T. E. Farrell, AUS-Farrell, AUSRet., who was
chief engineer in
the China-Burma-India theater
and later in
charge of field
operations for
the Nagasaki
and Hiroshima
strikes. His last

Maj. Gen. Farrell Mgr. Dir., ARO

strikes. His last Mgr. Dir., ARO active duty was as commanding general, Camp Rucker, Ala., in 1950.

Sees Advantages

Sees Advantages

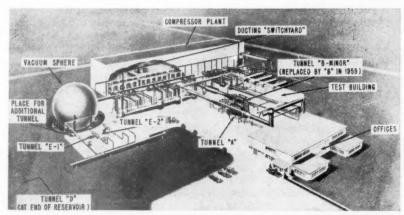

The Air Force feels that the organization of ARO has been of distinct advantage by permitting many members of the Sverdrup and Parcel firm's engineering staff who participated in the early design and survey work to carry through by being transferred into appropriate operational roles in ARO.

While an Air Force activity, AEDC is available to the other Armed Services and their manufacturers. Some missile work already has been done for the Army, while a number of the engines tested have been destined to power planes for the Navy as well as for the Air Force.

Formerly Camp Forrest

The Tullahoma site was selected be-cause of the availability of the enor-mous amounts of water and electric power needed for such an operation as

-Continued on page 20

SIX HIGH-SPEED TUNNELS of the Air Force's Gas Dynamics Facility at the Arnold Engineering Development Center are shown on this drawing. Test velocities up to five and ten times the speed of sound (3,800 to 7,700 mph) will be possible in three continuous-flow, and three intermittent-flow test sections of this laboratory. Part of the nation's Unitary Wind Tunnel Plan, the GDF is one of the major laboratories at this Air Research and Development Command wind tunnel center. The 100,000 h.p. compressor system for the laboratory is housed in the building in the background. The airstream is directed to the three continuous-flow, 40-inch tunnels in the center by a complex system of ducting, driers and heaters. Two of the intermittent tunnels are in the small building at the left, and the leftmost space is tentatively reserved for a future blow-down tunnel. Both of these, with 12-inch-square test areas, derive their air supply from a 720-foot-long, high-pressure airstorage reservoir in left foreground. The air rushes from this tunnel where it is stored at 4,000 pounds per square inch, through the test sections, and into a 72-foot-diameter evacuated steel sphere. The third "blow-down" tunnel, with a 20-inet test section, will exhaust directly to the atmosphere from a position at the far end of the 720-foot reservoir. the 720-foot reservoir.

MEMO For Journal Readers

SOME ARMY OFFICERS SUSPECT that budget pressures could be causing a slow-down in officer promotions. They note that a drop-off in officer boosts followed publication of SecDef Wilson's guidelines, which called for a new look at promotion policies. WHAT UPSETS SAME ARMY MEN is the fact that the Air Force, recently announcing more than 6000 selections to temporary captain and major, was able to tell the successful officers the exact date on which their promotions would become effective. THAT HASN'T BEEN THE CASE with Army selections, largely because Army strength goals have fluctuated. Though the Defense Dept. is putting strong pressure on the Service Secretaries to come up with personnel economies, no order has yet been issued from DoD curtailing promotions. It remains to be seen, however, what DoD and the Budget Bureau will do about authorizing grade structures, both officer and enlisted, for Fiscal '57.

THERE WERE INDICATIONS at SecDef Wilson's news conference this week that domestic operations of MATS may be curtailed, as proposed by the Hoover Commission; also flights made by Fleet Logistics Wings of the Navy and the Air Materiel Command's LOGAIR. THE COMBAT READINESS PROGRAM of MATS is certain to suffer as a result of any such cut, and that's the heart of the operation: to be ready as an M-Day force.

ONE HOOVER COMMISSION PROPOSAL has drawn opposition from SecDef Wilson. He does not agree that the Assistant Secretaries of Defense for Research and Development and Applications Engineering should be merged. NOT YET DECIDED by the Pentagon is whether or not to ask Congressional O.K. for two new Service Assistant Secretaries; they would be in charge of R&D for the Army and Navy. Mr. Trevor Gardner is AF Asst. Sec'y for R&D.

THE NUMBERS GAME in the Army took on a high-level aspect this week as plans were told for award of a contract to the University of Wisconsin for establishment and operation of a Mathematics Research Center. It will conduct research and investigations in mathematics and high speed computation theory. The Center will do work in the areas of numerical analysis, statistics and probability, applied mathematics and analysis and operations research "including linear and nonlinear programming, game theory and its applications, decision theory, information theory and optimization problems." THE ARMY COMMENTED that the Center "will provide mathematics complement to the support of a long range research intended to produce major capability improvements and inspire confidence in new approaches and ingenious applications of new ideas." ONE FIGURE WAS OMITTED from the Army's announcement: the cost of the new Research Center.

THE POSITIVE APPROACH is being stressed by Air Force personnel officials as part of the drive to raise reenlistment rates. Commanders are being advised that the normally used terms—Date of Separation, Discharge Date and Expiration of Term of Service—all indicate that the airman's service will end at a certain date. IT'S RECOMMENDED INSTEAD that counsellors use other terms—for example, Normal Reenlistment Date, Prospective Reenlistee and Date of Reenlistment.

ARMY AVIATORS REMAIN HOPEFUL that the Defense Dept. will O.K. its purchase of jet aircraft. The Commandant of the Army Aviation Center at Ft. Rucker, Ala., Brig. Gen. Carl I. Hutton, USA, urges that the Army should call such a plane "an aerial observation post if it is to be used to detect targets for missiles and observe their point of fall." THE ARMY GENERAL COMMENTS: "If we call it a reconnaissance airplane, someone will get out the functions papers and say that reconnaissance belongs to the Air Force." The Army had been scheduled to obtain some T-37 twinengine jets, which the Air Force intends to use as trainers, but Sec'y Wilson has held up the Army plane procurement.

IT WILL BE WORTH \$1000 to the SAC base which turns out the largest number of adopted military management improvement suggestions this year. The Air Force has hoped for several years that Congress would O.K. use of appropriated funds to reward beneficial suggestions, as is done with civilian employees. LACKING SUCH AUTHORITY, many commands use welfare funds for this purpose. The \$1000 prize will be given to the central welfare fund of the winning base.

BINGO GAMES THAT LOSE MONEY have been causing some concern in a number of major AF commands. Deficits resulted from too heavy outlays for entertainment, refreshments and prizes. It's been noticed that attendance at bingo games in some commands went up—not down—when charges were made to get the game on a self-supporting basis. SINCE OUTLAWING OF SLOT MACHINES, Service clubs have had to be extremely cautious about pursuing activities which do not pay their way.

TOP ARMY COMMANDERS OVERSEAS will get a chance to see the Army-Navy football game this year. The semi-annual Commanders Conference, always held immediately after the big game, this year will include Army chiefs from Europe, the Pacific, Far East, Alaska, and the Caribbean. In past years, the meetings frequently have been limited to commanders in the U.S.

SEC'Y BRUCKER WASN'T KIDDING when he asserted in recent speeches that he wants "branch consciousness" toned way down throughout the Army. He is insisting that the concept of one Army—"our Army," as he likes to call it—be stressed. AS A CONSEQUENCE, watch for Army press officers to make certain that announcements about activities of the various branches, such as the Quartermaster Corps and Ordnance, are prefixed with the designation of Army Quartermaster Corps and Army Ordnance.

MARINE AVIATORS are enthused over the selection of Maj. Gen. Vernon E. Megee, USMC, to be Assistant Commandant and Chief of Staff. Marine fliers now look forward to the time when one of their number will head the Corps.

THE NAVY CAN BE EXPECTED to follow the Air Force and Army in strengthening assistance given to officers and enlisted men on the retired lists. The Air Force has been doing a top notch job in this important morale area; now the Army is setting up a specialized Retired Activities Unit.

INVESTING Today

For RETIREMENT INCOME Tomorrow

Many service personnel, in planning for retirement, have regularly put money into savings. But some found these dollars buy about half as much now as they did ten years ago. Others found that planned investments in dividend-paying securities through Mutual Funds did a lot in offsetting this decline.

What does this mean to you? It means you can put your surplus dollars to work for you instead of letting them lie idle, Of course, investing incurs risk and reaching objectives is not assured. But thousands of people are now using Mutual Funds to build for retirement income! . . . doing it to reach their goal faster or to have more money when they do retire.

Investing for retirement through Mutual Funds seems to be "just right" for the military. Here's why: You can purchase them on a planned basis—out of present income. Professional investment men carefully select as many as 100 different securities for any one Fund, so all your eggs aren't in one basket. And they continuously supervise these securities. All details are handled for you automatically, too.

We have acted as financial counsellors to thousands of service personnel and civilians. We have helped them with their retirement problems through aid in the selection and purchase of Mutual Fund shares—shares in the Fund or Funds best suited to their personal aims. We'd like to help you, too,

Send a postcard today for our free BOOKLET containing full information on the Mutual Fund approach to financial planning for you and your family.

Our two identical heavy presses protect against production delays

PRODUCTION of heavy extrusions began this month at Kaiser Aluminum's Halethorpe, Maryland plant.

We are the only producer of heavy extrusions with duplicate presses-identical in size and capacity.

As a result, regardless of any temporary shutdown of either press, production can continue without interruption because dies can be moved from one press to another with-

Thus, air frame manufacturers are assured greater protection against delays and disrupted schedules.

Soundest, highest quality extrusions ever made!

Billets produced for these presses are made using revolutionary degassing and metal-working techniques - a Kaiser Aluminum first, offered exclusively by us. Result: a new or-der of billet quality; virtually free from gas porosity; highest degree of freedom from inclusions.

Each of these heavy presses is capable of producing a

finished aluminum extrusion up to 17 inches wide, 85 feet long, and up to 1,200 pounds in weight. In many cases substantially wider extrusions can be produced depending upon section design.

Kaiser Aluminum's new plant is completely equipped with the most modern facilities and fully integrated for the production of heavy extrusions exclusively.

Our engineers have had long experience in extrusion design and application. You are urged to take immediate advantage of their services.

Contact Kaiser Aluminum & Chemical Sales, Inc., General Sales Office, Palmolive Bldg., Chicago 11, Illinois; Executive Office, Kaiser Bldg., Oakland 12, California.

For details send for brochure, "Kaiser Aluminum Heavy Press Extrusions." Address: 61161 Kaiser Bldg., 1924 Broadway, Oakland 12, California.

NOTE: Make sure your funds are placed in an insured association.

The following offering provides the IDEAL program for the "away from home" Investor—INSURED SAFETY (no market fluctuation) combined with substantial income:

U. S. MARINE CORPS ORDERS

Commandant—General Lemuel C. Shepherd, jr. Asst. Comdt.—Lt. Gen. Randolph McC. Pate

COLONEL

McMillan, John H, MCB, CamPen; to Over-

seas.
Ordered from HqMC to listed stations are:
AirFMFPac, El Toro—Joseph N Renner.
MCSC, Albany, Ga—Walter T. Short.

MAJOR

Sartor, Louis J, NavB, NorVa; to NAS, Jacksonville, Fla.
Wood, Roy I, jr, IstMarDiv, CamPen; to HQMC.

HQMC.
Bowler, John A, ForTrps, CamLej; to MCRD,
Parris Is.
Burnam, Thomas J, NABTC, Pncla; to AIRFMFPAC, El Toro.

Ordered to InactvStaRetList from listed

Jacksonville—Cletus K Gibson.
MFPac, El Toro—William Oberhoff. AirFMFPac, El Toro

CAPTAIN

Overseas.

Hillip L, NAS, Jacksonville; to MCRD, Parris Is.

Ordered from Overseas to the following

ations are:
TdMAW, CherPt—Henry T Cook.
ForTrps, 29Palms—Carl R Leuders.

Wilson, William E, 2dMarDlv, CamLej; to 3dMAW, El Toro.
McCarthy, Frank D, ForTrps, CamLej; to Overseas.

FIRST LIEUTENANT

Army Navy Air Force Journal 19 Nov. 1955 (Vol. 93, P. 353)

Ordered Overseas from the listed stations

are:
2dMarDiv, CamLej—William T Nyland.
AirFMFLant, NorVa—Laurence A Campbell, III, and Chester A Liddle.
AirFMFPac, El Toro—Leonard D Fitzpat-

rick.
Ordered from Overseas to the indicated

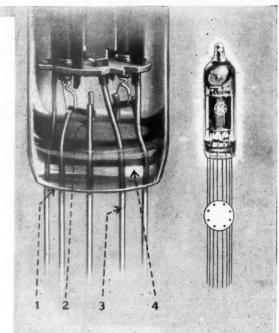

Ordered Hold Stations are: 2dMAW, CherPt—Richard B Arneson and Daniel B Smigay. NSA, FtMeade—Harry A. Marimon. Inactive Duty—Stephen G Reich and James

M Hart.
NABTC, Pucla—Frank B Wolcott.
Ordered to NABTC, Pucla, from the listed

BUTTON-STEM BASE OF G-E 5-STAR SUBMINIATURES INCREASES RELIABILITY...LENGTHENS TUBE LIFE!

- G-E 5-Star subminiature leads-spaced out circumferentially—are more than twice as far apart as with pressed-stem base construction, where the leads are in line. Also, spacing is more accurate and uniform. These widely-spaced leads help ward off glass electrolysis (which increases rapidly with higher temperatures) in the area where leads pass through the seal of the tube envelope. Means a longer-life seal and tube, since electrolysis, a result of electrical leakage breaks down the glass to a point where vacuum is impaired and tube failure can occur.
- 5-Star leads within the tube and seal are short, and parallel one another for a minimum distance—unlike pressed-stem internal leads, which are long and extend side-by-side. Result: 5-Star tube capacitance is lower, giving improved circuit performance, especially at high frequencies.
- 8 external leads in all are available with 5-Star subminiatures, against a maximum of 7 for pressed-stem tubes. With many tube types, this provides increased flexibility for the circuit designer. For example, only button-stem subminiature twin triodes can offer the designer separate cathode connections!
- Button-stem base construction makes 5-Star subminiatures nearly 10% shorter (approx ½ inch) than pressed-stem tubes. Equipment designers who face strict space limitations, benefit from G-E 5-Star compactness!

Above: actual size. Seated height of tubes is only 1.375 inches (max). Circular diagram over base pins shows how circumferential arrangement of leads in G-E 5-Star subminiatures, spaces them more widely apart than the in-line leads of pressed-stem tubes.

Add to these advantages of button-stem base construction, special 5-Star design throughout—sturdy, shock-resistant, electrically efficient and dependable! Add painstaking tube manufacture by selected, trained G-E 5-Star workers, in a separate 5-Star building where employees wear lint-free garments, and the air is pressured, filtered, and dehumidified to keep out dust!

General Electric 5-Star tubes are the most reliable subminiatures you can install. Ask for them in new equipment! Use them as replacements! Tube Department, General Electric Company, Schenectady 5, New York.

18 G-E 5-Star subminiatures are available, for a comprehensive range of circuit applications:

5718 5896 6021 5718-A 5896-A 6021-A 5719 5899 6111 5719-A 5899-A 6111-A 5840 5902 6112 5840-A 5902-A 6112-A

Navy Neptunes Will Fly To Antarctic In Dec.

Two Navy Lockheed Neptune planes will be the first aircraft to fly from one continent to the Antarctic.

The P2V Neptunes, piloted by LCdr. J. J. Torbett, USN, and LCdr. J. W. Entrikin, USN, are part of Air Development Squadron VX-6, the air arm of RAdm. Richard E. Byrd's, USN-Ret. expedition "Deepfreeze."

The Neptunes, equipped with skiis, will fly first to Christchurch, New Zealand, where they will take off 15 Dec. on the 2500-mile flight to McMurdo Sound, 500 miles west of Little Amer-

Eight planes in all are scheduled to make the final inter-continental flight from New Zealand to the Antarctic. However, the faster Neptunes will arrive four hours ahead of the other

Although their route across the Antarctic will be guarded by a lifeline of Navy ships, the 45 officers and men aboard the planes will be alone on the ice for 21 days before other elements of the expedition arrive.

The aircraft are loaded with survival

gear to provide shelter, warmth and food. The men will live in tents.
Squadron VX-6 under Cdr. Gordon K.
Ebby. USN, consists of 15 aircraft including three helicopters. Once in Antarctica the squadron has a three-fold mission: mission:

1. To lend support to the building of the two major bases, at Little America, and Byrd Station, as well as the air operating facility, McMurdo Sound, and to deliver by air-drop approximately 500 tons of materials for use of the Seabees in construction of a

Excellence in Electronics

at the South Pole during 1956-1957. Aerial mapping of all unexplored areas,

3. Ice reconnaissance missions or air-snow rescue of any surface party in distress.

All aircraft are identified by brilliant orange-red wing tips and tails that glow brightly even in the faintest daylight.

The Neptunes of Squadron VX-6 have been in training at Thule, Greenland, during the past year, operating with skis and jato takeoff at bases 7,000 to 8,000 feet above sea level. Primarily search and patrol planes, the P2Vs have been used extensively by the Navy for aerial mapping of polar regions.

Army Navy Air Force Journal 19 Nov. 1955 (Vol. 93, P. 355)

COL. LUIS F. MERCADO, USA, right, of Fourth Army Headquarters, who served as coordinator of the Army-Air Force reas coordinator of the Army-Air Force re-lief operations during the Tampico flood disaster, shows Col. A. J. Cooper, USA, chief of the training division of the G-3 Section at Fourth Army Headquarters, the medal presented to him by the Mex-ican Red Cross. The decoration is the Order of Honor and Merit in the grade of commander, which was given to Colo-nel Mercado for his outstanding perform-ance in support of the American Red

ance in support of the American Red Cross during the Tampico operations.

PLENTY OF ELECTRICITY for testing advanced electronic gear is needed on the Convair C-131B. These flying laboratories are being equipped with Solar's proven "Mars" ags turbine auxiliary power units, hung in pods. Two APU's will supply as much as 30 kw d-c, or 40 kva a-c, at 25,000 feet. Can light, compact Mars APU's solve your airborne power needs? Write Solar Aircraft Company, Dept. B-96, San Diego 12, Calif., for more information.

DESIGNERS. DEVELOPERS AND MANUFACTURERS OF METAL ALLOY PRODUCTS

Continued from page 11-

well as for the remoteness which isolates the operation and helps in its security. The area was used as the Army's Camp Forrest during World War II.

Essentially, AEDC's activities fall into its three major divisions of facil-ities—the Engine Test Facility with its ities—the Engine Test Facility with its Ramjet Addition; the Propulsion Wind Tunnel, and the Gas Dynamics Facility. Currently authorized construction funds amount to more than \$250,000,000 and will provide for the construction of the test laboratories and support sowies now planned.

port services now planned.

Scientists for its operation have been gleaned from all over the United States and Europe. It is interesting to note that Mr. Roy Smelt, chief of the Gas Dynamics Facility, was, during the wor war, at the British Royal Aeronautical war, at the British Royal Aeronautical Establishment at Farnborough in charge of intelligence on V-2 work. Manager of operations at the same facility is Mr. Edmond Stollenwerk who had charge of the German wind tunnels at Pennemunde where the V-2 was developed. Dr. Gernard H. Goethert, Chief of the Propulsion Wind Tunnel, was, during the war, Chief for high speed aerodynamics at the German Research Institute in Aerodynamics at earch Institute in Aerodynamics at

Berlin.

In addition about \$12,000,000 worth of the machinery now at Tullahoma was seized from a German establishment which had been set up at Munich shortly before the end of the war.

Engine Test Facility
Operating conditions realistically simulating those encountered by the engine of an aircraft or guided missile flying at altitudes of more than 15 miles above the earth's surface, and at sev-eral times the speed of sound, have been produced in the Engine Test Fa-The turbojet, ramjet or turboprop units may be mounted in a sealed test cell and "flown" through realistic operating conditions while thousands

operating conditions while thousands of data points are recorded to measure their operation and efficiency.

Since beginning test operations 18 months ago, the Engine Test Facility has tested, or is in the process of testing, eight turbojet engines for the aviation industry, which include the following: General Electric's J-17, J-47-33, L-73 and two types of the L-70 Other J-73, and two types of the J-79. Other engines tested in the facilities turbojet test cell are Allison's J-71, Wright Aeronautical's J-67, and Pratt and

Whitney's J-57.

These turbojet and some ramjet engines have been tested under a variety of conditions—altitudes from sea level to above 60.000 ft., temperatures ranging from —120° to +650° F. and speeds

from Mach 2 to 3.

The engines are locked into 121/4-The engines are locked into 12¼-foot-diameter sealed test cells, then "fed" intake air that has been conditioned to simulate various altitudes (plant capacity 80,000 feet above sea level) over a temperature range of from minus 120 degrees to plus 650 degrees Fahrenheit and at a mass air flow rate which will permit running engines at operating speeds in excess of twice the speed of sound (1500 mph). Ramjet engines have been tested in

Ramjet engines have been tested in a special water-jacketed test cell, which has a specially designed, variable-Mach-number supersonic free-jet noz-zle, 28 inches square, which also permits testing with variable angles-of-

attack.

The Engine Test Facility—like all wind tunnels—is concerned with solving four kinds of problems; the problems presented by velocity or Mach number; by altitude; by temperature; and by flight altitudes. Answers to these four types of questions are now beginning to issue from the ETF structure (450 feet wide, 600 feet long).

Ramjet Addition

Complete flights, from takeoff to landing, will be simulated for the supersonic, more powerful jet engines of the future in the Ramjet addition now being constructed.

Operating conditions up to four

BOOSTS THE RESERVE-Leading an intensive Pentagon campaign to strengthen the Nation's Reserve Forces, Assistant Defense Secretary Carter L. Burgess, left, has been speaking throughout the country. He is shown here with Maj. Gen. Leif J. Sverdrup, USAR, Commanding General of the 102d "Ozark" Infantry Division, during a recent visit to St. Louis, Mo. Mr. Burgess has said that the Defense De-partment believes there are shortcomings in the Reserve Forces Act of 1955, but pledges an all-out effort to make the law work as well as possible.

times the spede of sound—approximately 3,000 miles per hour—and altitudes substantially above 80,000 feet can be created in the laboratory which is scheduled to begin test work in 1957.

By using the 60,000 h.p. air supply and exhauster systems of the adjacent Engine Test Facility, and augmenting these with compressors and exhausters of its own, the Ramjet Addition will utilize almost 200,000 installed horse-power to simulate flight conditions for

the large ramjet and turbojet engines. Huge heaters, coupled with the re-frigeration and cooling equipment of the Engine Test Facility, will be used to provide RJA's testing temperature range of from minus 120 degrees F. to a mark substantially above 650 degrees F. This will permit realistic duplication of the high temperatures associ-ated with supersonic flight as well as the extremely low temperatures encountered at high altitudes

Propulsion Wind Tunnel

A new concept in jet engine testing, A new concept in jet engine testing, developmental tests on full-size, operating ramjet and turbojet engines mounted as they will be in actual flight, will soon be possible in the Propulsion Wind Tunnel.

Largest of the Country's major testing laboratories, the Propulsion Wind Tunnel will also conduct tests on large

models or full-scale aircraft and mis-siles. It is part of the Nation's Unitary Wind Tunnel Plan.

The PWT has two, closed-circuit, test The PWT has two, closed-circuit, test sections; one for transonic testing and the second for producing supersonic velocities. The first is scheduled to go into operation in early 1956 and is designed for test velocities of from 500-1.100 miles-per-hour (Mach number .8 to 16). The second on which constructo 1.6). The second, on which construction is underway, will be for tests at from 1,000-3,300 miles-per-hour (Mach number 1.5 to 5.0).

The steel ducting of each circuit varies from 28 to 55 feet in diameter and a two-land highway could be built through all of it. The closed-circuit design will also permit simulated condi-tions up to approximately 100.000 feet above sea level and over a wide range

of temperatures.

Several engine test labs in this country, including AEDC's Engine Test Facility, are conducting tests on vari-Facility, are conducting tests on various types of jet engines. However, since these labs are designed to run test primarily on only the internal aerodynamic performance of the engines, it has long been the hope of aviation experts that soon there would be a test lab wherein the engine could be "mated" with its airframe during a test run. This matching of the engine with its nacelle, pod or wing section in a wind tunnel test would, in addition to recording the inside aerodynamics, recording the inside aerodynamics, provide a means of gathering valuable test data on the overall aerodynamic

and propulsive effects on that portion of the airframe in which the engine is mounted.

Many of the problems associated with various types of engine inlets, at high speeds and high altitudes, can be studied in the back types.

speeds and night altitudes, can be studied in detail in the PWT.

Two special design features, promising greater testing efficiency and the production of more precise test data, are being built into the Propulsion Wind Tunnel.

Known as perforated walls and

Known as perforated walls and plenum evacuation, the design features will cancel out or minimize the effect of wall interference in the test sections of the wind tunnel. This makes possible a more realistic simulation of actual flight in the critical transonic speed

These design features are basically adaptations and improvements of sim-ilar applications used by the National Advisory Committee for Aeronautics on smaller transonic and supersonic wind tunnels, they have not before been used on such large test sections (16-feet square, 40-feet long) as those of the Propulsion Wind Tunnel's tran-sonic and supersonic circuits.

Gas Dynamics Facility

A unique series of supersonic and hypersonic wind tunnels, designed to probe the problems of the extreme problems of the extreme problems of the extreme pressures, temperatures and flow characteristics associated with flight at five and ten times the speed of sound (3.800 to 7,600 mph), are being constructed for the Gas Dynamics Facility. These wind tunnels also are part of the nation's Unitary Wind Tunnel

One of the facility's six test sections, intermittent tunnel E-1 has had its 12-inch-square test section in operation for more than two years and has attained test velocities nearing 4,000 mph.

During 1956 three more test sections will be placed in operation in this lab-oratory, These are: Tunnel A, a contin-uous-flow, 40-inch-square test section with a speed of Mach 5 (five times the speed of sound); Tunnel B-Minor, a continuous flow 50-inch-diameter test section with a capability of approximately ten times the speed of sound (this will be replaced by another 40-inch Mach 10 tunnel in 1958), and an intermittent-flow tunnel, designated E-2, which has a 12-inch square test section and a capability of Mach 10.

The most important feature of the Gas Dynamics Facility is its ability to closely simulate, and in some cases du-plicate, the test conditions that would be encountered by a full-scale missile, aircraft or projectile in actual flight.

Design of this supersonic-hypersonic aerodynamic testing laboratory was based upon a 1950 survey of requirebased upon a 1950 survey of requirements expressed by leading U. S. supersonic aircraft and missile designers. This survey determined three major demands: A need for relatively large test sections with velocities of Mach 5 and above; a requirement for pressures that would provide high Reynoldsnumber values to simulate more realistically the forces and friction temperatures of actual flight; and improved precision or uniformity of flow to avoid prohibitive errors in test data. (Reynolds number is a scale factor. The higher the Reynolds number, the closer the er the Reynolds number, the closer the comes to simulating actual

The GDF may be described as con-

The GDF may be described as consisting of two separate plants:

The continuous-flow plant has two test sections each of which is 40 inches square at the test area. Tunnel A, which will start calibration and test work in 1956, will have a Mach number range from 1.2 to about 5.5. Tunnel B will cover the range of Mach 4.5 to approximately Mach 10.

Pending the completion, in 1958, of Tunnel B, a 50-inch Mach 10 tunnel with axially-symmetrical, fixed-nozzle blocks called Tunnel "B-Minor" will be placed in operation next year. This temporary test section will be used until the flexible-nozzle Tunnel B is ready for use. At that time B-Minor will be

removed from the test circuit and re-placed by the more versatile Tunnel B. The pressure, velocity and type data

The pressure, velocity and type data sought determine the duration of the test run in the intermittent tunnels. Runs of from a few seconds up to 15 minutes are possible before it becomes necessary to replenish the 50 tons of air contained at pressures up to 4,000 pounds per square inch.

The intermittent plant has a high-pressure air storage reservoir and a vacuum sphere to operate two "blowdown" type tunnels and a third which exhausts directly to atmosphere. Both "blow-down" tunnels, E-1 and E-2 have test sections that are 12 inches square at the test area. The first duplicates Tunnel A's Mach number range of from 1.2 to 5.5 and the second matches the 4.5 to approximately 10 region cor-responding to Tunnel B.

The third intermittent test section,

The third intermittent test section, Tunnel D, will have a 20-inch-square test throat and will provide high Reynolds number test capabilities (exceeding those of actual flight) in the Mach 1.4 to 8 area. The Tunnel D will have a Reynolds number over 20 times those of typical existing tunnels.

On Test Program

The first test performed in the E-1 tunnel, in September 1953, was on the Hughes Aircraft "Falcon," an air-to-air Hughes Aircraft "Falcon," an air-to-air guided aircraft rocket. Following this initial test the tunnel performed inlet ducting tests for Republic Aviation Corporation's F-103 and F-105 fighters. These tests made it possible for Republic engineers to improve the design and increase the aircrafts' performance. formance.

A recent test program has contrib-uted to safe bombing techniques for modern jet aircraft at supersonic speed.

A series of tests have also been run for AGARD (Advisory Group for Aeronor AGARD (Advisory Group for Aero-nautical Research and Development, NATO) to determine the correlation of free flight and wind tunnel techniques on special models. Tunnel E-1 was able to perform this NATO testing over a wide Mach number range (2.0 to 4.0). At the present time North American Aviation is using the tunnel for re-

Aviation is using the tunnel for re-search investigation of cooling in boundary layer transition and the ef-fect of roughness in boundary layer

control.

The Mach 10 maximum afforded by AEDC's facilities is considered by the scientists there to be the maximum possible with the present concept of test tunnels. Some time in the future it will be necessary to go beyond that speed. This problem is one to which considerable thought and study is be-ing given, for the engineers are con-tinually looking to the future and they do not feel that AEDC will ever be completed—that is, there will always be a frontier to explore and we will need the tools with which to do it.

The Pentagon Word

THE LONG HAUL - "I would like nothing better than to be able to say to you with conviction that if the United States will but maintain its deterrent power for yet a few more years, peace will be achieved. I cannot say this with conviction. On the other hand, I am convinced that there is no miracle cure for the illnesses that beset this world. Rather. I think we are confronted with the necessity to support over an indefinite period of time, the strength necessary to prevent war.

"If this is sound, we should stop think-ing of peace as a millennium to be achieved through some miracle, as a resting place in our journey, and think of it instead as a task to be performed, painstakingly, year in and year out. Perhaps, we should think of preventing war as we do of preventing a fire. Not to have a fire in our home is an end sufficient unto itself. Not to have a war is also an end sufficient unto itself. It is worth the cost and the trouble neces sary to avoid a war, because the cost and trouble of having it is infinitely greater.

"Is this a bleak and profitless pros-pect? Not in relation to its alternative. We are entitled to hope that if we are

AF Promotes 931 to Permanent Captain

The following are the names of 931 Air Force permanent first lieutenants who

have been selected for permanent promotion to captain.

They will be advanced as they complete seven years' promotion list service.

Considered by the board were regular first lieutenants who would complete that service prior to 31 Dec. 1956.

The selections include:

s. 15

USAF List-852 Nurse—5 Med. Service—18 Veterinary-5

Women's Medical Specialist—1 Dental—7 Chaplains—7

(* indicates temporary major; ** temporary lieutenant colonel; † indicates first lieutenant rank)

Army Drive For Public Recognition Can Expect Strong Support From Civilian Aides

ARMY Secretary Wilber M. Brucker is out to "see that the American people are given a true picture of the United States Army." He chalks this up (THE JOURNAL, 29 Oct.) as one of his prime objectives.

The steps the Secretary will take to achieve his goal have not been outlined, but it can be expected that Mr. Brucker's first moves will be ex-

Mr. Brucker's first moves will be ex-ploratory and that he will seek assistance from many quarters in formu-

ance from many quarters in formulating his program to bring the Army "proper recognition."

Potentially, one of the strongest helping hands that could be extended to the Secretary belongs to a dedicated group of professional and business leaders who have been striving for much the same objective (and winning numerous friends for the Army) since WWI.

Known officially as "Civilian Aides to the Secretary of the Army," these men have been characterized as "the eyes, ears and conscience" of the Army's top boss.

Although

Although small in numthey currently to-tal 58 — the group includes senior representatives of widely - scattered communities throughout the United States. Re-cently, a Ci-vilian Aide also has be appointed for

Hawaii. Awaii.

Operating with little fanfare and less publicity, the present Aides and their predecessors have played an important role over the years in explaining the Army to their community. ities, and their communities to Army. The two-way street which they have constructed has brought better understanding all around and fostered the type of recognition which Secretary Brucker now seeks to en-

hance further.
Despite its long history, however, the Aide program is little known to the general public or the rank and file the general public of the rank and me of the Army. Army personnel are jus-tified in asking "What are Civilian Aides? How do they benefit the Army? Do they get paid for their work? How are they selected?"

The basic answers to these questions can be recited in a single sentence: A Civilian Aide to the Secretary of the Army is a prominent citizen, a leader and authority in his community and his respective field, who is appointed by the Secretary, without pay, to act as a vital link between the Army and the American people.

MB. WHITING

A Chief Aide, Mr. Tom R. Wyles, and a Deputy Chief Aide, Mr. Lawrence H. Whiting, head the list. In addi-tion, one Aide is appointed for each of the six Army areas, one (and in some each of cases. for

the 48 States. one for Hawaii.

To be selected, a prospective Aide must be a man of "outstanding character and patriotism," one who is "a recognized leader in his community" and whose stature will enable him to advise the Secretary without reference to partisan politics.

Once appointed, the Civilian Aide

helps to interpret the Army's mission and objectives to his community, and to interpret his community's point of to interpret his community's point of view and Army-connected problems to the Army. He also assists in orient-ing his community in the traditions, purposes and problems of the Army.

The Civilian Aide program was first conceived in 1922 by the Military Training Camps Association, a volun-tary organization of citizens interest-ed in national defense. Under MTCA, and with the approval of the Secre-tary of War, the Aides helped to re-cruit volunteers for the first officer

training camps.

After WWI, they did similar work in connection with the Citizens Military Training Camps, thus helping to

tary Training Camps, thus helping to provide the reservoir of trained othcer personnel which enabled the Army to rapidly expand at the beginning of WWII.

By the end of the second World War, however, the Aide system began to lose some of its original impetus. The Army had absorbed the officer training program, and the MTCA, except for a continuing interest in Universal Military Training, was unable to provide proper stimulus for the Civilian Aides.

In 1950, shortly after his appoint-

In 1950, shortly after his appointment, former Army Secretary Frank Pace, jr., carefully reviewed the waning program, decided that it could and should be revitalized, and took steps to reorganize the system and

ive it new momentum.

One of his first moves was to bring the administration of the Aides di-rectly into the Office of the Secre-tary. The transfer was effected, the program reorganized and new giude lines were laid down for the utilization of the Civilian Aides.

As the new program developed, Aides who had been appointed under MTCA were given the option of terminating or continuing their service. They were advised that those who elected to remain would be called upon to "engage in considerably increased activity." and, either at the call of the Secretary or on their own initiative, they would be expected to keep the Army informed of local opinion and of local needs for the welfare of the Army. Their new job was to "effectively assist in interpreting the Army's policies and activities to the American people."

A substantial number of Aides accepted the criteria of the new plan and remained to form the nucleus of the accelerated program. Their ranks were bolstered by new appointees "to obtain a broader cross section of national interests."

One of the new Aides was New minating or continuing their service.

One of the new Aides was New York businessman Robert T. Stevens, later Secretary Pace's successor as the Army's civilian boss. Another was Robert B. Anderson, later to serve as Secretary of the Navy and Deputy Secretary of Defense.

Mr. Stevens is still active in the program. When he left office last summer he summer he
was appointed by Secretary Brucker
as a Civilian
A i d e a t
Large. Former Under
Secretary of mer Under Secretary of the Army John Slezak also serves as a Civilian Aide for the State of Illinois

MR. STEVENS

Under the new program, both the Secretariat and the Army General Staff, as well as local commanders in

the various Army areas were encouraged to call upon Aides for active assistance in performing specific local missions. The overriding purpose of the program was and is "to help promote the efficiency of the Army and

its wholesome relationship with the American public."

Army commanders were requested to hold military orientations for Aides in their respective areas. In this way, the Aides were brought up to date on Army activities in and near their own communities, and formed closer working relationships with the Army com-

mander.

These practices have continued and, in addition, the Aides are advised about current developments and pol-icy changes through letters from the Secretary. Appointments are for two-year terms, thus giving each new Secretary the opportunity to select some men of his own choice for as-

some men of his own choice for assignment to the program.

Typical of the missions which the Aides have undertaken since the renaissance of the organization is the promotion of community recognition of returning Service veterans, beginning in the summer of 1952.

of returning Service veterans, beginning in the summer of 1952.

Under the leadership of the Fifth Army Civilian Aide, who garnered the assistance of the American Legion, Chicago became one of the first large municipalities to honor members of the Armed Foresor returning large municipalities to honor members of the Armed Forces returning from overseas assignments. The plan eventually was extended throughout Illinois, and the Chief Civilian Aide gave the green light to and supplied over-all guidance and assistance for similar programs in other cities across the Nation.

When Army Secretary Robert T. Stevens took office in February 1953, he continued the new emphasis on the

he continued the new emphasis on the Civilian Aide program. The following year, he initiated a national confer-ence of Aides and key Army person-

This first conference, held at Fort Leavenworth, Kans., brought the majority of the Aides and the Army's senior officials together for the first

senior officials together for the first time. A subsequent meeting was held at West Point last May; the practice will be continued under Secretary Brucker's leadership.

During these work-play sessions, the Aides participate in group discussions, roundtable sessions, briefings by top Army experts on a variety of subjects, and social gatherings which enable them to get to know the Army enable them to get to know the Army and its leaders at first hand. Most return to their communities with a

new understanding of the Army.
"I came home," one Alde wrote the
Secretary, "filled with the desire to Secretary, "filled with the desire to do all I can to promulgate the gospel of an honest, faithful and willing Army, desirous to serve the country to the best of its abilities." His re-action was voiced in similar phrases by the majority of those who attend-out the conferences. ed the conferences.

Army leaders say the work of the Civilian Aide is especially noteworthy in view of the fact that his position is an honorary one. His only reward is the personal satisfaction he finds in knowing that his advice and assistance have contributed to mutual understanding between the Army and the public, to the continuing im-provement of the Army, and to the over-all national security.

over-all national security.

For the most part, the Army Secretary turns to his Civilian Aides for advice and reaction only on matters of general policy. No heavy drain upon their time or energy is either called for or expected. Only occasionally do they receive requests for receive registrees leave the extractions. specific assistance on local matters

The combined activities of all the Aides, varied. however, are

In one locality an Aide may be called upon to help solve a housing shortage which has developed be-cause of the expanded activities of an Army base. In another, he may be asked to help inform local leaders of the urgent need for some facility

which the community opposes.

Or, Aides in a number of areas may foster ideas for needed legislation. This was done late last year and early this year when a number of Civilian

Aides backed State legislation to protect the employment rights of Reserv ists during summer training periods, and again this summer when Aides gave their support to the National Reserve Plan.

Reserve Plan.

Their "greatest contribution," however, Maj. Gen. Gilman C. Mudgett, USA, former Army Chief of Information, told the Aides at the West Point Conference last year, "lies in the field of creating a better public understanding of the Army."

This contribution, which is the sum of all the good works of the Civilian

This contribution, which is the sum of all the good works of the Civilian Aides, will strengthen Secretary Brucker's efforts "to bring proper public recognition to the Army's magnificent achievements, and the capability and dedication of its men and women."

Civilian Aides Include Key Men In All Fields

The list of Civilian Aides to the Secre tary of the Army reads like a miniature Who's Who of business and the profes-

Mr. Tom R. Wyles, Executive Director

Mr. Tom R. Wyles, Executive Director of the Steel Plate Fabricating Assn., Chlcago, is the Chief Civilian Aide.

The Deputy Chief is Mr. Lawrence H. Whiting, President of the investment banking firm of Whiting & Co., and of the American Furniture Mart Building Co., Chicago. Many of the Aides, like Mr. Whiting, have also been active in the Reserve Forces.

Civilian Aide at Large is former Army Secretary Robert T. Stevens.

Navy Opposes Bills For Women Officers

The Navy doesn't want to promote WAVE Reserve officers on the same basis as male Reservists. It would create an "injustice."

Several proposals were introduced during the first session of the 84th Congress calling for promotion and elimination of women officers of the Naval and Marine Corps Reserve on the same basis as males.

Here is the Navy's view:
"The bills would require a complete change in concept in providing for the promotion and elimination of women Reserve officers on the same basis as male Reserve officers. They would also be contrary to the principle of integration of Reservists with their corresponding Regular components. Regular components.

"Furthermore, this would undoubtedly result in an injustice to women Reserve officers by placing them in competition with male officers whose assignability and general utilization in a military organization is considerably greater than that of their female contemporaries." By BRIG. GEN. R. T. NELSON, USA

MODERN global warfare demands of an army a world-wide, fast and efficient communications network. Whether it be from one platoon to another or from one theater of operations to another this com-

munications network must function without hesitation or er-

The responsibility for providing this network for the United States Army rests with the Signal Corps. And the responsibility for prosibility for pro-viding the viding the trained person-nel to operate

Brig. Gen. Nelson

this network rests, to a large degree, with the Signal Corps Training Center (SCTC) at Camp

Gordon, Ga.
SCTC, with its two components, The Southeastern Signal School (TSESS) and the Signal Corps Unit Training Group (SCUTG), has turned out more than 70,-000 skilled signal technicians since its inception in October, 1948. These men have put what they learned at SCTC to practical use on the battle fields of Korea. on field manuevers in Europe, at air fields and weather stations in Greenland, and at every other spot in the world where the U. S. Army has troops. Many veterans of the Korean fighting have returned to SCTC to take their places as

THE MAJOR COMPONENT of the Signal Corps' Camp Gordon operation is The Southeastern Signal School. Here, under the direction of the school's com-mandant, Col. Otto T. Saar, 17 separate courses of study are pursued. These are divided into the fundamental eight and nine-week courses, and the longer, more technical courses which range from 10 to 25 weeks in length.

The majority of students enter the TSESS courses after the completion of their eight weeks of basic combat training. Many, however, are attached to the school on temporary duty, sent by their home units of the Army and National Guard to take refresher courses or to learn an entirely new signal skill. In addition, one may find students in the TSESS classroom from the Air Force, Marine Corps, the Women's Army Corps, and from several allied nations. their eight weeks of basic combat trainand from several allied nations.

and from several allied nations.

Graduates of the basic eight week courses include: Pole Linemen; Telephone-Installer Repairmen; Communications Center Specialists; Teletypewriter Operators; Telephone Switchboard Operators; Signal Supply Specialists: and Signal Parts Specialists.

Graduates of the more rigorous and lengthy courses running from nine to 25

lengthy courses running from nine to 25 lengthy courses running from nine to 25 weeks are: High Speed Radio Operators; Radio Teletypewriter Operators; Carrier Equipment Repairmen; Electrical Instrument Repairmen; Field Radio Repairmen; Cable Splicers; Manual Central Office Repairmen; Teletypewriter Equipment Repairmen; Power Generator Specialists; and Cryptographers.

Specialists: and Cryptographers.

THE ELECTRICAL INSTRUMENT
REPAIR COURSE is the only one of its
kind in the Army. Working with wires
thinner than a human hair and screws
almost microscopic in size, students learn
to service and repair the many delicate meters used on Army communications

equipment.

Another TSESS innovation is the course in RADIAC. Its full name, Radio Activity Detection, Identification, and Computation. well explains its function.

TELEVISION INVADED the TSESS classrooms in November, 1952. It soon became one of the most essential of the school's training tools. Now running on a regular daily schedule from its own studios, TSESS-TV brings into the classroom such things as commanders' conferences, special events, and instruction ferences, special events, and instruction in everything from the proper filling out of forms to the disassembly, repair, and

reassembly of such minute pieces of equipment as diesel fuel injectors and small radio sets. This type of equipment, difficult for a student to see when the instructor holds it in his hand, becomes natructor noiss it in his hand, becomes quite vivid to a large class when shown five or ten times its size on a television screen. Another advantage of closed-circuit TV is that a technical expert can lecture to many more men in a given time than he could by going from classroom to classroom. room to classroom.

In an adjoining area of the Signal Corps Training Center's sprawling 55,000 acre area the Unit Training Group carries out its function. Which is to train entire units, from company to battalion size, as opposed to TSESS's training of individual men.

These units are trained and prepared to take over the communications for an area up to the size of a complete theater

area up to the size of a complete theater of operations at a moment's notice.

COL LOWREY R. MOORE commands the UTG operation. He, with his staff, plans and executes a continuing program of training for men who have already completed their advanced individual training, and are skilled in a certain signal specialty.

SITFAC, the new Signal Integrated Training Facility, is a UTG innovation. SITFAC prepares signal units to move into a theater of operations anywhere in

into a theater of operations anywhere in the world and set up and man a complete communications system with links from the leader of an isolated patrol to theater headquarters and even to the Pentagon.

Boiled down to its essentials, UTG provides the Army with two important services: First, a working force which can set up a communications system for any unit in need of one. Second, and more important, a group that's combat ready, trained to go in and do a complete communications job-no matter how great that job may be.

That, briefly, is the story of the Signal Corps Training Center. Our mission here at SCTC is to mold men and units into signalmen and soldiers until the two are signalmen and soldiers until the two are fused into coordinated individuals capable of carrying out their own particular missions. We must train a man to be "Pro Patria Vigilans," vigilant for his country, and at the same time have the determination and ability to "Get the Message Through." Army Navy Air Force Journal 19 Nov. 1955 (Vol. 93, P. 359)

Services To Consume 7 Million Pounds Of Turkey

American servicemen will consume 7,000,000 pounds of turkey on Thanksgiv-ing, Christmas and New Year's Day.

Turkey will be served on all three holidays at most overseas stations. How-ever, beef will be substituted in Korea on New Year's Day, and baked ham will be the main course on menus at installations in the United States on New Year's Day.

The Army Quartermaster Corps began procuring turkeys, eviscerated and ready to cook, last August. Most turkeys slated for overseas installations, along with other holiday delicacies, were en route last month.

The Army Quartermaster Corps Pro-cures subsistence for all the Services, but the Navy, Marine Corps and overseas Army and Air Force commands prepare their own menus. However, their Thanks-giving Day dinner menu will be similar to the joint Army-Air Force menu for personnel stationed in this country.

The menu follows:

Chilled Fruit Cup or Shrimp Cocktail Roast Turkey with Sage Dressing and Giblet Gravy

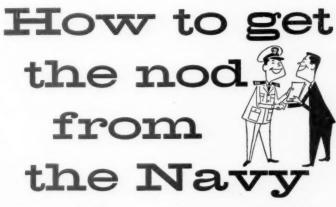

Cranberry Sauce Mashed Potatoes Candied Sweet Potatoes
Buttered Peas Creamed Onions Assorted Relishes Hot Rolls Butter Fruit Cake Pumpkin Pie or Mincemeat Pie Assorted Fresh Fruits Candy, Nuts Milk Tea Apple Cider Coffee

Ft. Carson Construction

Six new permanent barracks, each equipped with an orderly room, mess hall, kitchen, supply room and recreation room will be ready next year for nine Ft. Car-son, Colo., units.

Three of the units will move in about 1 March, the others by 1 July. Built at the cost of \$3-million, the barracks will house 263 men each.

Journal Will Tell Story of Global "Holiday of Service"

THROUGHOUT the years, THE JOURNAL has been privileged to report on the enthusiastic activities of Servicemen and their families throughout the world in aiding persons in distress during the Thanks-giving-Christmas-New Year's holiday period.

Officers and men of the Army, Navy, Air Force, Marine Corps and Coast Guard, with their wives and children, each year contribute many thousands of dollars to promany thousands of donars to pro-vide festive cheer at orphanages, hospitals and other institutions. Beyond this financial support, it is impossible to compute the number of hours that U. S. military families give in helping others to have a more healthy and happy holiday season.

During the next several months, the Posts and Stations pages and other sections of The Journal will strive to tell the story of how our military families — true Ambassa-dors of Good Will—again are making this a "Holiday of Service.

MRS. ROBERT N. YOUNG, wife of the Sixth Army Commanding General, pins an orchid corsage on Mrs. Riley F. Ennis, wife of the Sixth Army's new deputy commander, at a luncheon-bridge meeting of the Presidio Woman's Club where Mrs. Ennis was the guest of honor.

Ladies Golf Results

Merritt, welcoming and membership; K. Knight, hospitality; and Hine publicity.

471 Quartermaster Group Reunion

**COLUMBUS, OHIO. Brig. Gen. Hugh Mackintosh, USA, Commanding General, Columbus General Depot, was host recently to officers of his WW II command, General Mackintosh commanded the 4Tist Quartermaster group during WW II operations in Europe, was responsible for First Army Quartermaster Depot support, and participated in five First Army battles from Normandy Beach to the Mulde River in Germany. In addition to General and Mrs. Macking.

In addition to General and Mrs. Mackintosh the reunion was attended by the follow

ing:
Col. and Mrs. Hugh A. Allen, jr., Arlington, Va.; Lt. Col. and Mrs. Richard Hodges.
Alexandria, Va.; Mr. and Mrs. E. M. Orr.
Saunenin, Ill.; Mr. and Mrs. Robert W.
Grant, Cleveland, Ohio; Mr. William C. Cowgill, Wabash, Ind.; Dr. J. F. Mohr, Terre
Haute, Ind.; Mr. Carl E. Wallquist, Waltham.
Mass.; Mr. R. R. Ripley, Denver, Colo.; and
Mr. Walter S. Siciak, Bellemead, Md.

CHEMICAL CORPS WIVES SALUTE MILKMAN

DUGWAY PROVING GROUND, UTAH. The accolade of "A Housewife's Best Friend" was conferred upon Mr. Ray Angus, a milkman in Tooele, Utah, during a recent gift presentation ceremony arranged in the remote little desert community of the Chemical Corps testing center at Dugway Proving Ground, Utah.

Mr. Angus is viewed by many of his customers "with the same respect that might be granted only to the Pony Express riders of bygone years, who brought their services to isolated groups and incidentally crossed the same territory as Ray has since starting his route in November 1953," it is reported here.

Because Dugway is separated from Tooele by 45 miles and a mountain pass over 6000 feet in elevation, the ladies often are faced with horsehold and personal emergencies when they need some personal articles not available in the post exchange.

During the past two years, Mr. Angus has answered many a desperate tady's prayer—received by telephone at his home in Tooele—by taking his off-duty time to shop for articles ranging from flowers, dog food, and fancy hairpins to rare perfume—and delivering the specified articles next day to the appropriate doorstep at no extra charge.

extra charge.

In appreciation of this knightly attitude, the Women's Club of Dugway presented Ray with an outdoor charcoal broiler with spit attachment in a surprise opening to their regular meeting in the Officers Open Mess at Dugway.

Col. Lindsey Pushes Mc

FT. MEADE, MD. In the late 1920's 22
bronze plaques were erected on concrete
monuments at various points on post to commemorate officers and men of the WW I
Tank Corps who were killed in France. In
addition, famous war hero names were placed
on streets, roads, and avenues.

Of the original 22 plaques, 10 had disappeared by 1955 but were replaced. The others
have been repaired and brightened up with
touchup jobs during recent weeks.

This form of recording history has been
carried further this year under the guidance
of Post Commander Col. Julian B. Lindsey,
USA. In addition to replacing 10 concrete
monuments w/bronze plaques, Colonel Lindsey has ordered a dozen modern monuments
of the same type and size.

Dedication ceremonies for the new plaques
were held 10 Nov.
Guests for the dedication were Mrs. Floyd
L. Parks, wife of Lt. General Parks, USA,
Commanding General Second Army, Brig.
Gen. and Mrs. Thomas N. Griffin, USA, Chief
of Staff Second Army, Maj. Gen. and Mrs. William Bryden, USA-Ret., Brig. Gen. and
Mrs. Joseph C. Odell, USA-Ret., Col. and
Mrs. Dana McGowan, USA, and Lt. Col. and
Mrs. Dana McGowan, USA, and Lt. Col. and
Mrs. Dana McGowan, USA, Commanding Ofdeer Marine Detachment, Ft. Meade.

Those commemorated and the place of their
memorial are:

Girl Scout Week at Sill

Girl Scout Week at Sill

FT. SILL, OKLA. Opening of National
Girl Scout Week was marked here 6 Nov.
with special services for Girl Scouts and
Brownies at the New Post Chapel.
Col. William B. Estes, post chaplain, delivered the morning's sermon.
Brownie promise was led by Kathry Green,
while Peggy Miliner led the Girl Scout promise. Litany of Girl Scout laws was read by
Ellan Stark and Betsy Burgess, and Julie
Beth Tiede gave the Organization of Girl
Scouts.
The scripture was read by Ann Matheny.
"When E'er We Make the Promise" was
sung by a trio composed of Nellie Carter, Julle Means and Linda Stritzinger.
Girl Scout ushers for the service included
Phoebe Frank, Frances Green, Susan O'Connor and Mary Straight. Jennifer Best, Sharon
Blake, Maurine Gaynor, Sharon Maling and
Carolyn Robertson served as ushers.

ORPHANS GYROSCOPE

ORPHANS GYROSCOPE
KITZINGEN, Germany — Three former German orphans will be making the "Operation Gyroscope" trip next month to Ft. Riley, Kan., with the 1st Engineer Battalion.

The children, Darlene, 2; Mark, 15 months; and Lisa, 11 months, have been adopted by CWO and Mrs. Marvin E. Wilson, who are gyroing to Ft. Riley with the 1st Engineer Battalion in the third increment this month.

"We have never been as happy in our life as we are now," says Wilson. "We tried to adopt children in the States, but were prevented from doing so by State laws that made it difficult for a career soldier to adopt children."

Notes From San Diego

Notes From San Diego

SAN DIEGO, CALIF.—Maj. Gen. (USMC) and Mrs. George F. Good, Issued invitations to a buffet supper party, which preceded the Marine Corps birthday ball on 10 Nov. The party was held in the Good's quarters and the guests included: Marine Cols. and Mesdames F. L. Kilmartin, F. H. Cooper, Raymond Murray, K. A. King, J. T. Wilbur, J. C. Bigler, Lt. Col. and Mrs. O. W. Todd, jr., Lt. and Mrs. J. W. Williams, Mrs. D. M. Garrison, Capt. Halg Donabedian, Navy Capt. and Mrs. C. W. Reeder and Mr. Lee Good.

The game between the MCRD and Camp Pendleton on 5 Nov., attracted many Service football fans. At the Depot Maj. Gen. and Mrs. John H. McQueen hosted a luncheon at the Commissioned Officers' Club, before the kick-off, and arriving from the Oceanside Base as guests were the Commanding Officer, General and Mrs. Good, Brig. Gens. and Mesdames T. G. McFarland, Alan Shapley, Nels H. Nelson, Cols. and Mesdames August Larson, R. L. Murray, R. E. Hill, F. R. Payne, J. T. Wilbur, Wm. T. Battell, L. P. Hunt and Mr. and Mrs. Homer Pearce.

A group of Navy friends enjoyed the hospitality of Navy Capt. and Mrs. John Harllee when they entertained at a recent dinner party in their Coronado home. Places were set for Capts. and Mesdames E. W. Logsdon and Lawrence Baldauf, Cdrs. and Mesdames Daniel Bergen, Paul Luddy and Mark Gantar.

The San Diego Chapter, U. S. Naval Academy Alumni, is starting a new year with an interesting agenda. Recently elected to pilot these forthcoming activities are retired Navy officers: Capt. Jos. T. Talbert of Coronado, president; VAdm. T. H. Binford of La Jolla, vice-president; and Cdr. H. C. Jones, secretary-treasurer; Lt. Arthur D. Naplor, USN, will serve as assistant secretary.

Benning Fashion Show ■ FT. BENNING, GA. A style show and luncheon were given by wives of members of The Infantry School's advanced officers class

The Infantry School's advanced officers class 2 Nov.

Among the 103 guests were Mrs. Joseph H. Harper, wife of The Infantry School commandant, Mrs. Earl F. Klinck, wife of the School Brigade commander, and Mrs. Laurice E. Squires, wife of the executive officer of the First Battalion, School Brigade.

Hostesses for the occasion were wives of student officers of Second Platoon, Second Company, headed by Mrs. Lowell B. Harlan, wife of the student platoon leader.

Arrangements of autumn leaves graced the luncheon table. Mrs. James M. Lee was in charge of the fashion show.

Modeling casual styles from Town and Country, Inc., of Columbus, Ga., were Mesdames Herschel E. Chapman, Sidney A. Hines, jr., Thomas W. L. Hughes, Joseph E. Griffin, Mark E. Hanna, William H. Henry, jr., E. K. Crowley and R. R. White.

19 Nov. 1955 (Vol. 93, P. 363)

Gen. Burns Addresses Club BURNS, USAFF, FIA. Mat. Gen. Robert W. BURNS, USAFF, Commanding General of the Air Proving Ground Command, addressed the Officers' Wives Club 9 Nov., where he was introduced by Mrs. Walter Woodard, chairman for the luncheon. Wives of the DCS/Materiel sponsored the luncheon. Committee chairmen who assisted Mrs. Woodard were Mesdames Mrs. Robert Peters, decorations; Mrs. Thomas Williams, posters; Mrs. Alexis Parent, door prizes; Mrs. James Anderson, menu; and Mrs. Robert McCollister, flowers. During the short business meeting con-James Anderson, menu; and Mrs. Robert Mc-Collister, flowers. During the short business meeting conducted by Mrs. Gordon Baker, president, the Officers' Wives Club voted to donate \$300 to the Fledgling Roost. This fund will be monitored by Mrs. J. A. Nye and will be used to improve the nursery facilities.

NAVY SUPPLY CORPS OFFICERS' WIVES CLUB committee members are seen havy Soft-Li Cours of the Carlo wives countries members are seen here viewing the Club's scrapbook, a record of the organization's activities since 1948. They are (l. to r.) Mesdames William B. Durant, jr., treasurer; Willis T. MacKinnon, corresponding secretary; Joel D. Parks, vice-president, and wife of RAdm. Parks, Deputy Chief of the Bureau of Supplies and Accounts; Balph J. Arnold, president, and wife of RAdm. Arnold, Chief of the Bureau of Supplies and Accounts; Delmear R. Capell, executive chairman; and Harold H. Hunt, recording secretary.

Holiday Bazaar In Phila.

PHILADELPHIA, PA. — A Hollday Bazaar was the highlight of the luncheon on 10 November when the Officers' Wives' Club of the Army Signal Corps met at their Rittenhouse Square Building. Following the 12:45 luncheon' and Bazaar, a talk was presented by Mr. R. H. Foltz, representative of Freedom Foundation at Valley Forge.

Hostesses for the lovely luncheon included Mrs. James S. Willis, wife of Brigadier Ceneral Willis, (Ret.): Mrs. Ernest F. Powers and Mrs. Jack N. Nahas. Among guests at the luncheon were Mrs. Edwin Petzing, wife of Brigadier General Petzing, (Ret.) and Mrs. W. Hadley, guest of Mrs. Petzing.

MRS. OTIS MOREMAN, newly elected president of the Ft. Riley, Kans., Woman's Club, receives the records and gavel from the retiring president, Mrs. Bur-leigh F. Hillman.

Eustis Luncheon Attracts

Eustis Luncheon Attracts

FT. EUSTIS, VA. The monthly luncheon of the Officers Wives Club was enjoyed by more than 200 ladies recently. Guest artist was Lt. Arthur Panousis, concert planist, who has appeared in many well known New York shows and hotels. At Carnegle Hall, Lieutenant Panousis was chosen out of all musicians of Greek ancestry, to play for King Paul and Queen Fredericka of Greece, at the Waldorf. He is currently stationed at Ft. Lee and plans to go to the Pasadena Playhouse upon completion of his tour and then to Europe.

Mrs. Jack Fusan, program chairman was in charge of entertainment. The following ladies from Headquarters Troops were in charge of the luncheon: Mesdames James E. McShane, Chairman, Edward Moss, Alex Kaminski, Paul Briggs.

Cary McMurran, organizer and current conductor of the Peninsula Orchestra, spoke on the coming concert season. Seated at the speakers' table were Mesdames Rush B. Lincoln, honorary president, Honald M. Maldt, president, Curtis Jennings, Floyd K. Bennett, Joe Flake, Eugene F. Reynolds, L. R. McDonald, Francis J. Aerni, Charles L. Sims, Raymond L. Steinke, Robert E. Vandenberg, Lee D. Robbins, Edward W. Sawyer and Mrs. Bazire, mother of Mrs. Edward Sawyer.

Joins "Fighting 69th"

FORT DIX - Chaplain (Lt. Col.) William P. Golder, former pastor of the Ravens-wood Baptist Church in Chicago and a combat chaplain during World War II, has been appointed assistant chaplain of Ft. Dix and its "Fighting 69th" Infantry Division.

Ask Husbands to Fashion Show

■ NOBFOLK, VA. The members of the AFSC Women's Club of Norfolk invited their husbands to join them for an evening fashion review, recently, presented by one of Norfolk's leading shops. It proved a highly entertain-lng occasion for both sexes and was attended by a large turn-out.

ALLIED STUDENTS AID COMMUNITY CHEST

■ FT. BENNING, GA. The Infantry School's Allied student officer company has contributed 163.3 per cent of its Community Chest Drive quota. The School Brigade's Sixth Company, composed of Korean and Viet Nam officers, donated \$735; its quota

Capt. Paul R. Horne, company commander, explained the Red Feather drive to the ompany's interpreters, who translated for the benefit of their countrymen.

Hear Former POW

■ WILLIAM BEAUMONT AH, EL PASO, TEX. The Woman's Club held its first luncheon meeting of the season recently with Mrs. Louis S. Leland, president, presiding. During the past three months the club held informal morning coffees in lies of luncheon meetings.

The wives of the Hendaugreers officers were

The wives of the Headquarters officers were in charge of the program with Mrs. Abner Zehm, wife of the Post Commander, as chairman, Guest speaker was Capt. Drusilla Poole, ANC, Educational Coordinator at Beaumont Hospital, who was a nurse in China and later a prisoner of the Communists.

Mrs. James Shafer, program chairman, an-ounced the following schedule for 1955-56

9 Nov.—the annual fall tea, Mrs. George F. Peer, chairman and Lt. Col. Alice M. Grit-savage, ANC, co-chairman.

14 Dec.—a luncheon meeting and the enter-inment, Mrs. Robert Hunter, chairman. 11 Jan.—a luncheon and fashion show of ome-made clothes, Mrs. Robert Campbell, airman.

chairman.

8 Feb.—luncheon will feature an educational program by physical and occupational

therapists, Mrs. James Shafer, chairman.

14 March—a luncheon and presentation of film by the Dental Corps wives; Mrs. Roy odine in charge.

11 April-a luncheon and style show; Mrs.

George Peer, chairman.

9 May—a luncheon and election of officers;
Mrs. Carl Elander, chairman.

13 June—luncheon meeting and installa-on of new officers; Mrs. Joseph Hornisher,

Greeted At Toul

■ TOUL, FRANCE. The Officers and DACs Wives Club of Toul Engineer Depot held a Welcoming Tea recently for three newly-arrived wives at the TED Officers and DACs Club here recently. Mrs. Betty Whitt, Mrs. Herta Parker and Mrs. Georgia Mae Phillips were entertained.

Named General Agent

Col. Hugh Sawyer, USAFR, has been appointed General Agent in Virginia with offices in Richmond by the Manhattan Life Insurance Co. A graduate of West Point, Colonel Sawyer served in the Reg-ular Army from 1937 until his resignaSELFRIDGE AFB, Mich.—Memories of 13 years ago were revived for Harry G. Moock, jr. (left), and Maj. Gen. Robert E. L. Eaton, USAF, new Tenth Air Force commander. Moock, now an account executive for a Detroit motion picture firm, and his wife, Suzette, were among guests of General and Mrs. Eaton (right) at the commander's reception for Detroit area community leaders. In 1942 Moock was an enlisted man in the office of then Colonel Eaton, who was CO of the 2d Weather Squadron at what now is Wright-Patterson AFB, Dayton, O. SELFRIDGE AFB, Mich.

He has been vice chairman and general manager of Republic Aviation International at Lugano, Switzerland. following activation Switzerland, following retirement in 1953. General Crawford's new headquarters will be in Paris.

COL. DONALD McCLURE, USAF-Ret., who resides at 357 Vernon Street, Oak-land, Calif., has been appointed Assist-ant Real Estate Commissioner for Cali-fornia, with offices at 1182 Market Street, San Francisco, California.

COL. T. A. SEELY, USA-Ret., 1635 Gough Street, San Francisco, Calif., has joined the insurance division of Balfour, Guthrie Company, Ltd. He retired last spring as Deputy Commander and CofS of the Military District of Washington.

CAPT WILSON P. COGSWELL, USN-Ret., who was Director of the Electronics Resources Production Agency before his retirement in 1952, consultant to the Lincoln Laboratories of M.I.T. until 1954, and part time consultant to the Strom-berg-Carlson Co., has been appointed Staff Assistant for Operational Analysis -Military in the Engineering and Re-search Department of the Strombergsearch Department of the Stromberg-Carlson Co., a division of the General Dynamics Corp. The 1922 USNA gradu-ate holds Master of Science degrees from Harvard and Stanford. He and Mrs. Cogswell reside at 200 Collingsworth Drive, Brighton, N. Y., a suburb of Rochester.

CAPT. THOMAS G. REAMY, USN-Ret., has been named as application engineer by ALCO Products, Inc. and will be responsible for the application of ALCO's diesel engines to general marine service. He will make his headquarters at Schenectady, N. Y. Captain Reamy retired 10 Oct. as inspector of machinery and navel inspecspector of machinery and naval inspec-tor of ordnance at the Schenectady plant of the General Electric Company, after more than 30 years of naval service. He was graduated from the U.S. Naval Academy in 1925, and later received his mas-ter's degree in mechanical engineering from the University of California.

LT. COL. D. F. LEPERA, USAR-Ret., who ended his active service in November 1954. has been appointed treasurer of the Central Electric Appliance Co., Inc., of Palo Alto, Calif., where he resides at 1600 University Avenue. His last service was at Cairo, Egypt.

Gen. Michaelis Names Col. Gilman As CofS

Col. Seymour I. Gilman, USA, has been appointed Chief of Staff, Southern European Task Force, at Leghorn, Italy.

Colonel Gilman will act under Commanding General of SETAF, Brig. Gen. John H. Michaelis, USA.

Before his assignment to SETAF, Colonel Gilman was Commanding Officer of the 12th AAA Group in Kaiserslautern, Germany.

Army Plans New Unit

To Aid Retired

The Army shortly will advise the thousands of officers, warrant officers and enlisted men on its Retired Lists that a new Retired Activities Unit has been set up to help them.

Maj. J. B. Maylard, USA, has been designated to head the new activity, under Maj. Gen. John A. Klein, USA. The Retired Activities Unit will provide a centralized office to which all retired Army personnel may call or write for information or assistance.

A Pentagon announcement said that "in addition to being a clearing house for inquiries, one of the primary objectives of the Retired Activities Unit will be to promote a greater interest in Army affairs by keeping retired personnel abreast of their rights, privileges and benefits." tives of the Retired Activities Unit will

benefits."

General Maxwell D. Taylor, USA.
Chief of Staff, has pointed out during
recent speeches the need to keep retired military men up-to-date on current

Army developments and problems.

The new unit will work closely with service agencies and appropriate associations. The Army said that, while the Retired Activities Unit intends to be of maximum service to retired personnel, it will not act as an employment placement of the propriate of the pro ment agency.

BIGGEST TC REVIEW

More than 6000 Transportation. Center troops at Ft. Eustis, Va., were to march in review on 18 Feb. to honor Maj. Gen. Bertram F. Hayford, USA, Deputy Chief of Transportation, who retires on 30

Maj. Gen. Gray Ret. Writes Railroad History

Railroading in Eighteen Countries, the story of American railroad men serv-ing in the Military Railway Service from 1862 to 1953, has been published by Charles Scribner's Sons.

Written by Maj. Gen. Carl R. Gray, jr., USA-Ret., Director General of the Military Railway Service from 1942 to 1945, the handsome volume is 351 pages long and retails for \$5.

Although this book reviews military railroading from the beginning, it deals essentially with the use of railroads by the Services during WW II and Korea.

The scope of the book is summed up y General Gray in the foreword. He writes:

"This is the story of the use of rail-roads in WW II and the increment of the American Army known as the Mili-tary Railway Service. There were more than 351,000 men and women employees of the American railroads who served in all arms in WW II. Of that number, 43,500, or approximately 12 per cent, were assigned to the various units of the Military Railway Service, and thus rendered a superb technical service. These men, from all sections of the Operating De-partments of the railroads, were organized into units corresponding to the divi-sional organization of a railroad. They operated the railroads in the war zone, and, as nearly as could be done, rail-roaded in the American way."

This impressive record of their achievements covers history, organization, training and operations in Alaska, England, North Africa, Sicily and Italy, Northern France and Belgium, Southern France, Germany and Austria, Iran, India, the Philippines, New Caledonia, Australia, Japan and Korea.

A notable feature of this book is the wealth of fine photographs of operations in all areas, for the most part photographs not seen before.

When WW II began, General Gray was Executive Vice President of the Chicago, St. Paul, Minneapolis and Omaha Rail-way. In WW I, he served as captain, major and later lieutenant colonel in the

When activated into the Military Railway Service in 1942, he was a Reserve Colonel of the United States Corps of Engineers. Appointed a Brigadier General and Manager of Military Railway Service, he commanded that Service in the Mediterranean Theatre of War and eventually became Director General of the Military Railway Service, European Theatre, with the rank of Major Gen-

For six years after the close of WW II, he was Administrator of Veterans' Affairs, succeeding General Omar Bradley in that office.

Dept. Rejects Military Science Academy As Unnecessary, Difficult To Administer

The Defense Department is opposed to a United States Armed Forces Science Academy proposed by Representative Edith Nourse Rogers (R-Mass.).

Such an institution, the Pentagon says, is "unnecessary." Furthermore, it would not materially aid in the procurement of leaders.

Congresswoman Rogers proposed the new Academy during the first session of the 84th Congress, but no action was taken on the proposal before adjourn-

ment.
As visualized in Mrs. Rogers' bill, HR
6165, the Academy would train selected
persons for service as scientists and engineers in the Armed Forces.
The Defense Department outlined its
objections to the measure in a letter to
Chairman Carl Vinson (D-Ga.) of the
House Armed Services Committee. Here
are the Pentagon arguments against the are the Pentagon arguments against the

plan:
The United States has a substantial number of excellent scientific and technical educational institutions. These institutions are able to offer varied opportunities for scientific and technical training at both graduate and undergraduate military minded professional combat military minded professional combat level because of the breadth of their interests, as well as the diversity of their means of support and administrative and educational policies.

The recruitment by the Armod Forces of scientists and engineers who have graduated from such schools will provide more diversity of training and experience than could reasonably be provided by a single military academy. Graduates from the Service Academies and ROTC graduates of civilian institutions are sources. presently available and helpful to the armed forces.

The assignment of military personnel The assignment of military personnel to civilian educational institutions for graduate training and research will more adequately satisfy the needs of the military services than would the assignment to a single military academy. As an example of this, the USAF Institute of Technology takes advantage of widely diverse civilian scientific training facilities throughout the nation with minimum expense to the Government.

Finally, the Pentagon states, "Estab-

Finally, the Pentagon states, "Establishing a new science academy in the Department of Defense would be unnecessary, difficult to administer, and would not materially aid in the procurement of military minded professional combat leadership."

A Marine Corps selection board has named 594 captains for increased rank. Approximately 300 will be given immedipromotions.

The total includes 523 unrestricted, 34 limited duty and 37 supply duty cap-

The board, headed by Brig. Gen. Ran-dall M. Victory, USMC, made its selections from two promotion zones-one for unrestricted and supply officers, and second for limited duty captains. The unrestricted zone extended from Thomas R. Rhymes through Robert J. Epperson, lineal positions 841 and 1416 in the 1 Jan. 55 Register.

There were about 700 unrestricted and active duty Reserve captains in the zone, with approximately 200 being passed over for the first time. About 80 offi-

over for the first time. About 80 offi-cers were named from above the zone. The LDO promotion zone began with Woodrow W. Brown and ended with Kenneth M. Stayer. Only one LDO was named from above the zone, with 33 of 38 in-zone officers named for major's rank (Indicated by asterisk.*) About 30 of 140 eligible active duty Reservists were picked. The remaining advancements will be made as vacancies occur. Marine Head-

made as vacancies occur, Marine Head-

quarters says.

Gen. MacArthur Given Baby Cup—75 Yrs. Late

The Army's 13th Infantry Regiment recently corrected a 75-year-old oversight . . . and presented General of the Army MacArthur with a name-in-Douglas scribed baby cup.

A long-established tradition of the 157-

year-old regiment calls for a cup to be presented each baby born while his father presented each baby born while his father is serving with the regiment. General MacArthur was born in 1880 at Little Rock Barracks, Ark., while his father, then Capt. Arthur MacArthur, was commanding Company K of the 13th.

Somehow down through the years General MacArthur, pages received his cur-

eral MacArthur never received his cup ... until recently when it was presented to him by Maj. James L. Spratt, 13th adjutant, who served under General Mac-Arthur in the Pacific.

Col. Craig Is G-3

Col. William H. Craig has been appointed G-3 at Headquarters Second Army, Ft. Meade, Md. He had served as Deputy G-3 since July.

Deputy G-3 since July.

Colonel Craig, who replaces Col. John
R. Jeter, who recently retired, is married
to the former Miss Margaret Magruder,
daughter of General and Mrs. Marshall Magruder. They have five children: Helen M., 18; William H. jr., 17; Anne P., 16; Marshall W., 11, and Peggy, 8.

BOUNDS—Born at Fitzsimons AH, Denver, Colo, 8 Nov. to 1st Lt and Mrs Jesse C Bounds, a daughter.

BROOKSHIRE—Born at Ft Riley, Kans, 3 Nov, to 1st Lt and Mrs Grail L Brookshire, a son.

a son.

BUCHANAN—Born at Fitzsimons AH, Denver, Colo, 9 Nov, to 2d Lt and Mrs Charles W Buchanan, a daughter.

BURY — Born at Ft Knox, Ky, 8 Nov, to 2d Lt and Mrs Dale Bury, a daughter, Beth

Ann.

CAMPBELL—Born at Aberdeen Pr Gr, Md.
6 Nov, to 2d Lt and Mrs Edward J Campbell,
a son, Raymond Michael.

CAMPBELL—Born at Ft Campbell, Ky, 6
Nov, to 2d Lt and Mrs George E Campbell,
Jr, a son, George Emmett, 3d, grandson of
Col (USA) and Mrs Campbell, sr, of Washington, DC

CARBERRY—Born at Osaka, Honshu, Japan, 16 Oct, to Sie and Mrs William F Carberry, a daughter, Pamela L.

COSTA—Born at Ft Devens, Mass, 8 Nov, to Capt and Mrs John Costa, a daughter.

CUNZEMAN—Born at Ft Belvoir, Va, 8 Nov, to CWO and Mrs Paul W Cunzeman, 3301 Richmond Highway, Alexandria, Va, a daughter.

DASHIELL—Born at Walter Reed AH, Washington, DC, 11 Nov. to Capt and Mrs Samuel C Dashlell, 4515 Sangamore Rd, Washington, DC, a son, Joseph Arthur.

DAUENHAUER — Born at Walter Reed AH, Washington, DC, 9 Nov. to 1st Lt and Mrs Erwin Dauenhauer, a son.

DIGERONIMO—Born at Brooke AH, Ft Sam Houston, Tex, 3 Nov. to Capt and Mrs Rocco J DIGEronimo, a daughter.

DODSON—Born at Ft Sill, Okla, 2 Nov, to CWO and Mrs C Dodson, a son, Keith Durae.

CWO and Mrs C Dodson, a son, Keith Durae. DRAKE — Born at Ryukyus AH, Ft Buckner, Okinawa, 1 Nov, to Capt and Mrs Marion C Drake, a son, Robert Arthur.

DRUCKER—Born at the University of Va Hosp, Charlottesville, Va, 10 Nov, to Lt and Mrs Stanley W Durcker, a daughter, Karen. DUNAWAY—Born at Ft Ord, Calif, 31 Oct, to Lt (USN) and Mrs Gene T Dunaway, 26 Cielo Vista Drive, a son, Michael Trayser.

DUTTON—Born at Brooke AH, Ft Sam Houston, Tex, 7 Nov, to Capt and Mrs Caivin P Dutton, a daughter, Marsha Beth.

EATON — Born at Ft Knox, Ky, 7 Nov, to 2d Lt and Mrs Stephen E Eaton, a daughter, Kristine Elizabeth.

Kristine Elizabeth. FERRITER—Born at Ft Belvoir, Va. 7 Nov. to Lt Coi and Mrs Richard H Ferriter, 2129 No Troy St, Arlington, Va. a daughter.

FULTZ—Born at Brooke AH, Ft Sam Houston, Tex, 6 Nov, to 1st Lt and Mrs James E Fultz, a son, James Chris.
GLEASON—Born at Ft Carson, Colo, 6 Nov, to Capt and Mrs James J Gleason, 2408 N Meade Ave, Ft Carson, a son.

GOFREY — Born at Walter Reed AH, Washington, DC, 9 Nov, to Capt and Mrs William Godfrey, a son.

GORMAN—Born at Ft Meade, Md, 3 Nov, to CWO and Mrs Peter J Gorman, a son. GRAY—Born at Ft Riley, Kans, 29 Oct, to 1st Lt and Mrs Morris P Gray, a daughter, Caroline Una.

GUENTHEB — Born at Ft Monmouth, NJ, 10 Nov, to 2d Lt and Mrs Wayne F. Guenther, 603 Pinebrook Rd, Eatontown, NJ, a

HAGEDON — Born at Samaritan Hosp, Troy, NY, 7 Nov, to Capt and Mrs George G Hagedon, a son, Mark Alan.

HALL — Born at Walter Reed AH, Wash-Ington, DC, 11 Nov, to 2d Lt and Mrs Rob-ert M Hall, a daughter.

HAMMER—Born at Kenmore Mercy Hosp, Kenmore, NY, 17 Oct, to Lt Col and Mrs James E Hammer, 182 Lowell Road, Ken-more, a daughter, Lucy Allen.

HARRIS—Born at William Beaumont AH, Ft Bliss, Tex, 31 Oct, to CWO and Mrs Cecil F Harris, a daughter.

HARRIS—Born at Ft Devens, Mass, 4 Nov. to Capt and Mrs Charles Harris, a son.

HEATH—Born at Tokyo, Japan, 23 Oct, to Capt and Mrs Ralph M Heath, a son, John Fredrich.

HENSON—Born at Reese AFB, Tex, 1 Nov, to 2d Lt and Mrs William D Henson, a daughter, Pamela Gayle.

HILL — Born at Ft Knox, Ky, 6 Nov, to Capt and Mrs James E Hill, a son, James Eugene, jr.

HILL — Born at Ft Knox, Ky, 3 Nov, to 2d Lt and Mrs James R Hill, a son, William

HINDS—Born at Ft Carson, Colo, 3 Nov, to WO and Mrs James L Hinds, 2129 Downing Drive, a son.

HOUDEK—Born at Cp Chaffee, Ark, 7 Nov, to 1st Lt and Mrs Thomas J Houdek, a daughter.

daughter.

HUGHES — Born at Ft Knox, Ky, 4 Nov, to 2d Lt and Mrs James B Hughes, a son, David Bentley.

HULME — Born at Ft Monmouth, NJ, 11 Nov, to 2d Lt and Mrs John R Hulme, 151 Bridge Ave, Red Bank, NJ, a son.

IMHOF—Born at Ft Dix, NJ, 2 Nov, to 1st Lt and Mrs John Imhof, twin sons, John David and Karl Steven.

David and Karl Steven.

JACQUES—Born at William Beaumont AH, Ft Bliss, Tex, 1 Nov, to 1st Lt (USAF) and Mrs William F Jacques, a son.

JAFFE — Born at Ft Benning, Ga, to Lt Col and Mrs Morton S Jaffe, twin daughters, Janice Ann on 14 Nov, and Jennifer Jane on 15 Nov. Mrs Jaffe is the former Miss Hildur Lundy, of Brookings, S Dak.

JAMES—Born at Ft Meade, Md, 4 Nov, to 1st Lt and Mrs Frank D James, a daughter.

JONES—Born at Ft Sill, Okla, 5 Nov, to Capt

JONES — Born at Ft Sill, Okla, 5 Nov, to Capt and Mrs C L Jones, a son, Jefferey Alian.

KEATING—Born at Ft Devens, Mass, 6 Nov, to Capt and Mrs John Keating, a son.

KENNEDY—Born at Ft Carson, Colo, 31 Oct, to 1st Lt and Mrs Earl Kennedy, 738 West Monument St, Ft Carson, a daughter.

KLINE — Born at Walter Reed AH, Washington, DC, 13 Nov, to 1st Lt and Mrs Thomas C Kilne, a daughter.

KOEHN — Born at Fitzsimons AH, Denver, Colo, 5 Nov, to Capt and Mrs Robert C Koehn,

a son.

a son.

LACKMAN—Born at Walter Reed AH, Washington, DC, 5 Nov, to 1st Lt and Mrs William F Lackman, jr, 1026 So Frederick St, Arlington, Va, a daughter, Carey Anne.

LAKIN — Born at Osaka, Honshu, Japan, 3 Nov, to 1st Lt and Mrs George A Lakin, a daughter, Ellen M.

LAPINSKES — Born at Ft Monmouth, NJ, 13 Nov, to 2d Lt and Mrs George S Lapinskes, 254 West End Ave, West End, NJ, a son.

LEIGHTON—Born at Ft Eustis, Va, 6 Nov. to 1st Lt and Mrs Herbert H Leighton, a daughter.

daugnter.

LINDSEY—Born at Ft Carson, Colo, 5 Nov, to 1st Lt and Mrs James W Lindsey, 706 Lake, Ft Carson, a son.

Small Business Benefits Through More Set-Asides

A new Department of Defense Instruc-tion, designed to increase the participa-tion of small business in defense production to the maximum extent possible by means of the set-aside device was an-nounced this week by Reuben B. Robertson, jr., Deputy Secretary of Defense; Wendell B. Barnes, Administrator, Small Business Administration; and T. P. Pike, Assistant Secretary of Defense (Supply and Logistics).

Under the Instruction, directed to all

military purchasing offices, the joint Small Business Administration—Department of Defense program of setting aside procurements for the exclusive participation of small business concerns

will be broadened.

Specifically, the Instruction provides

be made at all military procurement agencies whether or not a Small Busi-ness Administration representative is

ness Administration representation present;
Partial set asides for small business will be made whenever the procurement can economically be split and when two or more small business suppliers are available;
Classified, as well as unclassified, procurements will be screened for potential set asides; and.
At the option of the procuring activity, set asides may be made of procurements under \$10,000.

"Secretary Wilson and I are keenly aware of the importance of small business to defense production," Mr. Robertson said, "and we are going all out to work with the Small Business Administration." tration and do our job together. This Instruction points the way for our enlarged program.'

larged program."

The new Instruction is the third major step in the program developed jointly by Small Business Administration and Department of Defense representatives. Previous actions were the revision of the overall Department of Defense small business program and the initiation of a small business subcontracting program. "The Defense Department leadership is the beginning of the program of the program

"The Defense Department leadership is to be complimented on their splendid cooperation in the Government's small business program," Mr. Barnes said. "Working together in the manner visualized by the new Instruction, the Department of the Complete State of the State ment of Defense and the Small Business Administration will be still more effec-tive in assisting small firms to obtain their fair share of defense procurement."

"The Small Business Administration is charged by law with direction of the Federal Small Business Program," Mr. Pike said. "Mr. Barnes is giving aggressive and untiring leadership in this area and we are supporting him wholeheart-edly. The Military Departments are co-operating fully in carrying forward this program," Mr. Pike declared.

AF Gets New Photo-Reconnaissance Plane

The RF-101 Voodoo, photo-reconnais-sance airplane, has been delivered to the Air Force by the McDonnell Aircraft Corporation.

The first craft is already undergoing gh altitude photographic tests from high altitude photographic tests from Lambert Field in St. Louis, Mo., and the

second is in early flight stages.

The development of the RF-101 will enable the Air Force operational units to carry out supersonic photo-reconnais-sance missions as routine flight proced-

A modification of the F-101A Voodoo, the new craft is equipped for in-flight refueling. By utilizing cockpit controls, the ruening. By Utilizing cockpit controls, the pilot can operate the entire camera system while in flight. After the basic instructions are "set" in the system, the photo procedure becomes completely automatic. tomatic.

Several different types of cameras can be quickly interchanged through large access doors, making it possible to carry out any type of photo-reconnaissance mission on short notice.

Security Committee **Holds First Meeting**

The first meeting of the Industrial Advisory Committee on Safeguarding Clas-sified Information was held 17 Nov. at the Pentagon to brief newly appointed members on policy.

The Committee, established last month by the Department of Defense to assist it in implementing the Department's industrial security program, is concerned with the various ways of safeguarding classified information in the possession of in-

Appointed Chairman of the Committee is Jerome D. Fenton, Director of the Of-fice of Industrial Personnel Security Pol-icy. Vice Chairman of the Committee is Robert L. Applegate, who also serves as Staff Director of the Industrial Security Programs Division under Mr. Fenton. Newly appointed members of the Com-

mittee are:
Eric Barr, Electric Boat Division, General
Dynamics Corporation, Groton, Conn: R. R.
Blackwell, Allicon Division, General Motors
Corporation, Indianapolis, Ind.: C. W. Brabs-Blackwell, Allison Division (General Valors Corporation, Indianapolis, Ind.: C. W. Brabston, Michael Baker, Inc., Jackson, Miss.; L. P. Buchman, Glenn L. Martin Company, Middle River, Md.; John L. Buckley, Varian Associated, Palo Alto, Calif.: Edward F. Conrov, American Cyanamid Company, N. Y.; Harry Crow, Johns Hopkins University Operations Research Office, Chevy Chase, Md.; Glenn V. Dierst, Boeing Airplane Company, Seattle, Wash.; B. F. Kavanaugh, Hercules Powder Company, Wilmington, Del.; David Lester, Hupp Corporation, Detroit, Mich.: E. B. Olive, Cameron Iron Works, Houston, Tex.; J. A. Ranallo, Thompson Products, Inc., Cleveland, O.; Russell E. White, General Electric Company, Schenectady, N. Y.; R. D. Williams, Battelle Memorial Institute, Columbus, O.

Former ATC Official **Heads Rex Division**

The Garrett Corporation, Los Angeles, Calif., has announced establishment of its new Rex Division to conduct a long-

range research and development program in the field of aeronautics.

The Rex Division is headed by E. M. Ellingson, manager, and R. S. Rae, chief engineer, and is a completely separate operation from other Garrett Corporation activities. tion activities.

Mr. Ellingson was director of mainte-nance and engineering for the Air Trans-port Command, AAF, during WW II; later was West Coast manager and di-rector of operations for the Air Trans-port Association, joining The Garrett Corporation in 1954 as assistant to the

president.

Rae, after serving during WW II with Rae, after serving during ww 11 with British Admiralty as a research engineer, joined the Johns Hopkins Applied Phys-ics Laboratory, Washington, D. C., in 1948. He later became president of his own organization, Flight Research, Inc., prior to joining the Rex Division.

Supersonic Simulators

The Air Force has awarded a contract for \$8,000,000 to Link Aviation, Inc., for an additional quantity of supersonic flight simulators.

The contract, which is for delta-winged

F-102 interceptor simulators, increases the company's backlog to approximately \$35,000,000. Link delivered the first F-102 simulator, ordered under a previous contract, to Tyndall AFB, Fla., last May.

New Auxiliary Power Unit

Electrical and mechanical or hydraulic Electrical and mechanical or hydraulic power to operate guidance and control systems in guided missiles is furnished by a new auxiliary power unit developed by The Garrett Corporation's AiResearch Manufacturing Division.

It develops a power punch of 650 watts and can be un-rated when precessary to

and can be up-rated when necessary to and can be up-rated when necessary to 1600 watts. Lighter and smaller than previous units in the same category, the compact AiResearch package weighs only 29 pounds with dimensions of 13 by 10 by 7 inches.

Admiral Leggett Boosts Portable A-Plant For Isolated Stations, Captured Cities

A portable atomic power plant for the Armed Forces has been recommended by RAdm. Wilson D. Leggett, USN-Ret., former Chief of the Navy's Bureau of

Admiral Leggett, now Vice President

in charge of Engineering of ALCO Products, Inc., out-lined his views in a paper pre-sented to the National Industrial Con-ference Board in New York dustrial ity recently. He said one

of the little recognized chores of the Armed Forces

is furnishing power in devastated areas. We had two destroyer escorts and hundreds of small diesel engines pumping power into the city of Manila for months after we recaptured it. A thoroughly transportable power plant utilizing nu-clear fuel could greatly reduce the effort that would have to be devoted to such work as this in a future war and the men, ships and transport which would thereby be released could be devoted to offensive effort."

The Admiral said "We don't have the thoroughly portable nuclear power plant yet, but it can be done when we get around to it."

The ALCO organization is the con-

tractor for the Army package power re-actor (APPR) currently under construction at Ft. Belvoir, Va., and expected to go into service early in 1957.

Another area where plants of this type can be used, he said, is in the chain of bases which the United States is building throughout the world. He noted that The power requirements of these bases cannot normally be supplied from local utilities—if there should happen to be any. Every item of logistics support that can be eliminated means fewer convoys or supply trains that might have to get

to these bases under war conditions."

Admiral Leggett said "Long exposed supply lines are areas of military vulnerability," and the Armed Forces must "foresee and eliminate or reduce such weaknesses."

He added that he is sure "one of the

He added that he is sure "one of the reasons that the world has been able to hang on to a precarious peace with cold wars and hot wars coming and going all over the place is the fact that we have made significant progress in such preparedness. The situation will prevail so long as we maintain our position which, of course, can never be static. Nuclear power plants making our outlying bases more independent would be a step along this

The ALCO official said nuclear package power plants in isolated locations also "will reduce the number of people who have to live in these God forsaken spots or face the hazards of going to and fro

to them."

He concluded that it also "is entirely conceivable to me that we will some day have package plants for powering some of the smaller Naval vessels." Admiral Leggett said the cost of an

atomic power plant in the 10,000 kw range might be twice as much as that of a conventional coal-burning station, but he added that the cost "will come down we build more of them."

Military 'Copter Award

The Lycoming Division of Avco Man-ufacturing Corporation has been con-tracted by Sikorsky Aircraft to produce main gear box kits for military heli-

The contract, in excess of \$1-million, calls for production of gear boxes for the recently introduced Sikorsky S-56 twin-engine helicopter. The first box is scheduled for delivery next May with stepped-up monthly deliveries continu-ing through November 1956. The contract is the third signed recent-

the contract is the third signed recent-ly between the two companies. Previous contracts called for Lycoming to supply the R-1820 engine for the Sikorsky S-58 helicopter and the R-1300 engine for the factured by Lycoming under license from Curtiss-Wright.

Radiological Hot Cell For ARDC at Dayton

A radiological hot cell, a chamber for the study of atomic radiation, is being constructed for the Air Research and Development Command at Dayton, O.

Development Command at Dayton, O.

One of the largest and best such facilities in the country, the cell will have two main uses: the study by WADC engineers of materials or equipment that have been placed in an atomic reactor and are themselves radioactive, and to enable WADC to subject materials or equipment to redistion.

to enable WADC to subject materials or equipment to radiation.

The chamber will be the Air Force's only facility for all types of work on radioactive materials, such as radiochemistry, metallurgy and irradiation with cobalt-60. Work on the chamber is expected to be completed by next month.

Appoint L. H. Mulit

Mr. Lloyd H. Mulit has been appointed to be Director of Procurement and Production in the office of Asst. Secy. T. P. Pike (Supply and Logistics) to replace Mr. Warren Webster, resigned.

Mr. Mulit has been in the Planning and Paving Division in the same office

and Review Division in the same office since last March. He was formerly asso-ciated with several large oil producing companies as a purchasing officer.

Changing Station? Notify the Army Navy Air Force Journal promptly to avoid missing any issues.

Northrop To Expand Flight Test Facilities

Flight Test Facilities
Construction on expanded production
flight test facilities for Northrop Aircraft,
Inc., at Palmdale, Fla., will begin next
month. The project will be financed by
and operated for the Air Force.

The new buildings, which will total
nearly 3500 square feet, are scheduled
for completion next March. They will include a new personnel and plant protection office building, a new fire equipment
storage station and additions to the existing paint and strip building.

In addition, concrete and asphalt runup and aircraft parking areas will be en-

up and aircraft parking areas will be en-larged by 140,000 square feet. Electric power installations and heating and ventilating facilities also will be expanded.

AMC To Industry

Richard M. Osgood has been appointed manager of Equipment Fabrication at the new Waltham, Mass. laboratories of Sylvania Electric Products, Inc. He will direct the manufacture of prototype equipment, developed by the suicoic and ment developed by the avionics and guided missiles research staff at the aboratories.

Laboratories.

Before joining Sylvania, Colonel Osgood was Chief of the Electronic Systems Division of the Air Force's Air Materiel Command. He was responsible for the coordination of the design and installation of a semi-automatic Air Defense System for continental United States, and less the DEW Linear the postbory and see the DEW Linear the postbory and see the Command of the also the DEW Line on the northern edge of North America. He is a 1941 graduate of West Point.

Ex-Pentagon Officials Join Piasecki Board

Thomas K. Finletter, former Air Force Secretary, and John F. Floberg, former Assistant Secretary of the Navy for Air, have been elected to fill two new seats on the Board of Directors of the Piasecki Helicopter Corporation.

Decision to increase the number of Board members from 11 to 13 was made at a special meeting of Piasecki shareholders. The shareholders also approved adoption of a stock option plan and de-cided to defer action on changing the company's name.

ing at the New York Neurological Institute, he was a graduate of the Medical Field Service School and the Army Medical School. From 1942 to 1946, Colonel Porter was Director of the School of Military Neuropsychiatry at Lawson General Hospital, Atlanta, Ga., and in 1946-47 at Brooke General Hospital, Ft. Sam Houston, Tex. He was retired from active duty in April 1947, when he became Superintendent and Medical Director of the Los Lunas, N. Mex, Mental Hospital. Colonel Porter, a Service Fellow of the American Medical Association and a Fellow of the American Psychiatric Association, was the author of a number of publications applying to military psychiatry.

He is survived by his widow, Mrs. Aimee Porter of Los Lunas; and one son, Maj. William Porter, USMC.

Capt. Jno. Volney McAlpin, DC, USN-Ret.

Funeral and burial services were held recently at Arlington National Cemetery, Washington, D. C., for Capt, John Volney McAlpin, DC, USN-Ret., who died at the Bay Pines Hospital, Bradenton, Fla., on 3 October.

Bay Fines Hospital, Bradenton, Fla., on 3 October.
Captain McAlpin, a native of Bradford, Pa., entered the Navy in 1914, as a member of the Dental Corps and saw service in both World Wars. He served as personal Aide to President Warren G. Harding on the former President's Inspection tour of Alaska, during which the President was fatally stricken; later, Captain McAlpin was attached to the White House staff during the Calvin Coolidge administration. He was one-time Director of the Naval Dental School, Washington, and was the first to command the School after to became an entity of the Naval Medical Center in 1936, Captain McAlpin, prior to his retirement from active duty in 1944, had served as the senior Dental officer at the Jacksonville, Fla., Naval Air Station, from the time of its establishment in 1940. Since his retirement he had made his home at Bradenton.

Bradenton.

He is survived by his widow, Mrs. Laura Jane Pepple McAlpin of Palma Sola Park, Bradenton; two grandchildren, one greatgrandson, two sisters, Mrs. Margaret Ramos, professor of Spanish at Dickinson College, Carlisle, Pa., and Mrs. Wilton S. Hail of Waverly, N. Y., and one brother, Dr. Paul McAlpin of Tupper Lake, N. Y.

Mrs. Estelle Jeanette Koster

Funeral services were held at San Francisco, Calif., on 7 Nov. for Mrs. Estelle Jeanette Koster, who died at Let-terman Army Hospital on 3 Nov. after a long illness. Burial was at the Golden Gate National Cemetery, San Bruno, Calif. Mrs. Koster was the widow of Lt. Col. Peter Koster, JAGD, who was killed in action at Subic Bay, P. I., on 15 Dec 1944, while aboard a Japanese

15 Dec 1944, while aboard a Japanese prison ship.

Born in New Bedford, Mass., Mrs. Koster was married to Colonel Koster, a graduate of the Law School of the National University, Washington, D. C., in August 1918. They served tours in Virginia, Washington, D. C., Texas, the Philippines and San Francisco and while in San Antonio, Tex., and Ft. McKinley, P. I., Mrs. Koster was most active in teaching, church work and Gril Scout activities. Since 1941, she had made her home in San Francisco.

She is survived by two daughters, Mrs. Helen M, Gill of 420 Secor Rd., Hartsdale, N. Y., and Mrs. Constance J. Hubbard of 2806 Union St., San Francisco.

two years, they also were first commissioned about one year after I. Their age over mine gave them the jump on me.

Something is fundamentally unsound about a promotion system which permits

one officer to advance from 2d Lt. to Lt. Col. in eight years while another equally well-qualified, deserving officer is still a Captain after twelve years' active commissioned service. The mere statement on the part of some staff officer that no system could be devised which would be universally fair and just is not accept-able. Will D/A undertake action to adjust able. Will D/A undertake action to adjust present grades held by all officers in relation to actual service? I seriously doubt it, but such should be instituted as soon as possible. I fear that if something of this nature is not implemented in the near future, the Army will witness the mass exodus of an almost prohibitive number of its younger career officers. In 1954, 975 career officers resigned from the service—a careful check of that section service—a careful check of that section of the 1955 Army Register which lists these resignations will reveal that the overwhelming majority were in the 27-32 year age bracket and members of the four combat arms.

four combat arms.

I invite any responsible member of Department of Army G-1 to reply and convince me beyond reasonable doubt that the present officer promotion system and its attendant policies are as sound and equitable as can be devised.

AF Domestic Airline Explained By Gen. Winn

Details of the domestic airline operated by the Air Force were outlined recently by Brig. Gen. Raymond L. Winn, USAF, Director of Transportation and Services of the Air Materiel Command, at the annual meeting of the American Society of Mechanical Engineers in Chi-

cago.

LOGAIR, General Winn explained, is a domestic airline providing "an air transport capability within the Zone of Interior that is not otherwise available from any other source today."

The system connects major Air Force depots and bases, and all aerial ports of embarkation into an integrated air cargo network. It is operated by commercial air carriers under contract to the Air

LOGAIR has 27 C-46 type aircraft and seven C-54 type aircraft devoted ex-clusively to air cargo transport. There are 20 terminals in the system, and the 34 planes fly a total of 1½-million scheduled miles monthly.

successful in preventing war over a sufficient period of time, war itself will die of disuse. But we should not insist that our national defenses must justify themselves in terms of achieving an ideal, ultimate peace. If they prevent war, and particularly the kind we would

war, and particularly the kind we would now have to fight, they are money and effort well spent."

Air Force Secretary Donald A. Quar-les, at a World Peace Luncheon on 11 Nov. at Birmingham, Ala.

MEETING THE CHALLENGE -- "We cannot meet the cold war challenge of Communism . . . if we rear and educate our children merely as technicians, steeped in a materialistic philosophy of life. Communists, in the Iron Curtain countries they control, have concentrated on such a philosophy and have subverted the youth of their countries to the naked materialism which they preach . . . Living as free men, we need have no fear of this wicked system if we match our continuing material progress with a wider understanding of the dignity of man and his individual responsibility to man and his individual responsibility to his Creator, as well as to his fellow men —General J. Lawton Collins, USA, on the occasion of his accepting the Cardinal Gibbons Award from the Catholic University of America Alumni Association at Washington, D. C., on 12 Nov.

SOVIET NAVAL POWER-"Our Navy views the Soviet navy building program with grave concern. We have been building some new ships, too, although not nearly as many as the Soviets. We have built some new destroyers that have better sea-keeping qualities, better armament and better equipment than their World War II predecessors. These ships have better means of finding and killing the submarine. We are placing more submarine countermeasures aboard our submarine countermeasures aboard our ships and aircraft. We are building more intelligent and deadly torpedoes. We are building rocket-propelled anti-submarine weapons. We are building submarines to kill other submarines."—Admiral Arleigh A. Burke, USN, Chief of Naval Operations, speaking at the homecoming of the Commander of the American Legion, at Battle Creek, Mich., on 12 Nov.

USMC Gens. Move: Some Promotions

Three stars are in prospect for Maj. Gen. Edwin A. Pollack, USMC, Commanding General, Marine Corps Recruit Depot, Paris Island, S. C., when he succeeds t. Gen. Gerald C. Thomas, USMC, as Commandant of the Marine Corps Schools, Quantico, Va. General Thomas retires in four-star rank on 1 January.

Other top level shifts include the assignment of Maj. Gen. Verne J. McCaul, USMC, Commanding General, Second Marine Aircraft Wing, MCAS Cherry Point, N. C., as relief for Maj. Gen. Vernon E. Megee, USMC, Commanding General, FMF, Atlantic, who becomes Assistant CMC.

General McCaul will be relieved by Brig. Gen. John C. Munn, USMC, who has been selected for two-star rank. General Munn is the Corps' Inspector General.

Maj. Gen. Joseph C. Burger, USMC, Director of the Division of Reserve at Head-quarters takes the post vacated by General Pollock.

eral Pollock.

Brig. Gen. Thomas G. Ennis, USMC, presently serving as Assistant Commanding General of the First Marine Aircraft Wing, FMF, Pacific, succeeds General

Brig. Gen. Frank C. Croft, USMC, Com-

mander, Marine Corps Air Bases, Cherry Point, N. C., is General Ennis' successor. Brig. Gen. Carson A. Roberts, USMC, on duty at the Marine Corps Schools, Quantito, Va., becomes the new Inspector

Col. Edward A. Montgomery, USMC. who advances to one-star rank, moves into the post vacated by General Croft. All reassignments will be effected in January and February 1956.

Army Navy Air Force Journal 19 Nov. 1955 (Vol. 93, P. 371)

M/G Megee First Pilot In USMC No. 2 Spot

From page 1-

USMC, a ground officer, was placed in command. His Chief of Staff was an avia-tor, Col. Boeker C. Batterton, USMC.

Today, the Task Force is led by an aviator, with a ground officer as Chief of Staff. Brig. Gen. Edward C. Dyer, USMC, is Commanding General, and Col. Frederick A. Ramsey, jr., USMC, is in the number two slot.

The Corns' policy of developing of the corns' policy policy policy policy policy policy polic

number two slot.

The Corps' policy of developing officers capable of commanding combined forces, whether they be ground or air officers, was demonstrated during assult maneuvers held in the off the California coast which concluded on 18 November. The which concluded on 18 November. The land phase of the operation was under control of Maj. Gen. Clayton C. Jerome, USMC, an aviator, who is presently serving as Commanding General, Aircraft, Fleet Marine Forces, Pacific.

That the ability of the individual, rather than his background, governs appoint.

Fleet Marine Forces, Pacific.

That the ability of the individual, rather than his background, governs appointments to combined ground-air commands is pointed up by the fact that both three-star Fleet Marine Force generals have dissimilar military experience. Lt. Gen. Alfred H. Noble, USMC, a ground officer, leads Fleet Marine Forces, Atlantic, while Lt. Gen. William O. Brice, USMC, an aviator, is in command of Fleet Marine Forces, Pacific.

Eventually, the interchange of ground and air officers in command and staff positions will reach down into the lower unit organizations. A program is now underway in the Marine Corps for the exchange of ground and air officers within the staffs of Fleet Marine Forces.

The aim of the plan is to provide all officers the opportunity of gaining an appreciation and understanding of the other component. The Marine Corps points out that participating officers are not assigned to liaison billets, but are full working members of the staffs to which they are attached.

Tours of duty at Force and Wing-Division level are for two years, while assignments to lower levels run for about a year. Normal overseas tours, however, apply to officers serving in deployed units.

Sage Brush Sidelights

Sage Brush is wired for action, Under Col. Roland O. S. Akre, USAF, with Col. Norman L. Tittle, USA, as his deputy, J-5 technicians will lay enough wire to reach from New York to Japan to provide communications for the mammoth exercise. Army and Air Force communications experts will watch closely to find out how the new AN/TRC 29 microwave relay system, getting its first heavy test, performs. This transportable system carries 23 voice channels, operating with ultra nigh frequencies out of range with ultra high frequencies out of range of commercial, air-defense, air-sea-res-cue and other emergency type radio net-

The Army's 1st Loudspeaker and Leafbe a "neutral" in the Sage Brush battle actions. The L&L outfit will employ its wares against forces on both sides

. . .

The Tactical Air Command will dem-onstrate the long-range capability of its aircraft during Sage Brush with airto-air refueling missions spread over a 13-state area.

Acting Vice CofS

General Williston B. Palmer, USA, Army Vice Chief of Staff, was admitted to Walter Reed Army Hospital on 14 November for a "thorough physical check-up."

Named as Acting Vice Chief of Staff was Lt. Gen. Walter L. Weible, USA. Filling General Weible's post as Dep-uty Chief of Staff for Operations and Administration is Maj. Gen. Donald P. Booth, USA, Assistant Chief of Staff, G-1.

Bliss Finance Chief

Col. Roy W. Bartlett, USA, has been named Post Finance Officer at Ft. Bliss. Tex., following two and a half years with the Joint U.S. Military Advisory Group, Greece, as comptroller of the American Mission.

MAJ. GEN. IRA K. EVANS, USA, (left), Quartermaster, Army Forces Far East/-Eighth Army, is congratulated by Presi-Eighth Army, is congratulated by President Syngman Rhee, of the Republic of Korea, who has just presented him with the Order of Military Merit Taeguk, for his "outstanding and meritorious Service" as AFFE/8A Quartermaster from April 1954 to November 1955. The ceremony was held in the Presidential Palace, Kyung Mu Dai. Seoul. Kyung Mu Dai, Seoul,

M/G DeShazo Named CO of A&GM Center

Maj. Gen. Thomas E. DeShazo, USA, Maj. Gen. Thomas E. Deshazo, USA, Chief, Military Assistance Advisory Group, Paris, France, will return to the U. S. in February to take command of the Artillery and Guided Missile Center at Ft. Sill, Okla.

He will replace Maj. Gen. Edward T. Williams, USA, who will report to Continental Army Command Headquarters at Ft. Monroe, Va., in February.

This shift could be related to the retirement of General John E. Dahlquist, USA, CONARC Chief, who is expected to be succeeded by his deputy, Lt. Gen. Willard Wyman, USA.

M/G Matthews Will Go to Ft. Riley in Dec.

Maj. Gen. Willis S. Matthews, USA, Deputy for Training, Organization and Training Division, SHAPE, will return to the U. S. in December for assignment to Ft. Riley, Kans.

Riley is the home of the 1st Infantry Division which returned recently from duty in Germany to change places with the 10th Infantry Division. Its present commander is Maj. Gen. Guy S. Meloy,

Jr., USA.

Brig. Gen. Louis Cotulla, USA, who is deputy director of the U. S. European Command, Logistics Division, will report to the Pentagon in February to replace Brig. Gen. Will W. White, USAF, as Staff Director for Petroleum Logistics under Assistant Defense Secretary T. P. Pike. General White will leave active service.

Also announced this week was the re-

Also announced this week was the re-tirement, effective 30 Nov., of Brig. Gen. Kenneth S. Sweany, USA, office of the Army Chief of Staff, after 32 years' service.

Japan to Brookley

Col. Henry Clay Dorris, USAF (MC), has been appointed base surgeon, Brookley AFB, Ala. His prior tour of duty was with the 6110th USAF Hospital in Japan.

ARMY UNDER SECRETARY CHARLES C. FINUCANE, left, looks at the mechanism of a Corporal missile during his recent visit to AAA & GM Center at Ft. Bliss, Tex. With him are Maj. Gen. Paul W. Rutledge, Ft. Bliss, commander, and Mr. C. M. Reed, Post Ordnance Section.
